TOMMY G. THOMPSON
GOVERNOR
STATE OF WISCONSIN

Governor Thompson

Welcome to Wisconsin!

For nearly two centuries, the people of Wisconsin have treasured the enormous fresh-water resource that lies at our doorstep – the Great Lakes. It is an abundant resource that has sustained us and enhanced our lives through six generations.

The *Wisconsin Great Lakes Public Access Guide* is a new publication designed to showcase our coastal resources. It presents a balanced mix of access, resource and recreation information. You'll find it a handy reference to our lakeshore communities.

Enjoy our Great Lakes and the varied recreational opportunities they offer. Off the water, meet our people: we've earned a solid reputation for Midwestern hospitality and friendliness that's hard to beat.

Remember, in "Wisconsin . . . You're Among Friends!"

Tommy G. Thompson
Governor

Table of Contents

Introduction	2-9
Southern Lake Michigan	10-29
Northern Lake Michigan	30-55
Lake Superior	56-70
Index	71-72

How to Use This Guide

The *Wisconsin Great Lakes Public Access Guide* is designed to help you locate a wide range of public access sites, state parks, recreational areas, wetlands and natural areas along Wisconsin's Lake Michigan and Lake Superior shores.

The *Guide's* access information is divided into three sections: Southern Lake Michigan, Northern Lake Michigan and Lake Superior. See the handy color-coded table of contents above and key map on the opposite page to determine your general destination. Then simply page to that color-keyed section.

Each section opens with a general description of the

region followed by a series of maps and tables that contain corresponding numbered access points. Some maps include insets of enlarged city areas; all show the general location of area marinas. The maps of Lake Michigan proceed in series from south (Kenosha) to north (Marinette). The maps of Lake Superior proceed from west (Superior) to east (Saxon Harbor). The tables that accompany each map list such information as parking availability, boat launching facilities, if fees are required, fishing and picnicking availability, and facilities that are accessible to people with disabilities. The tables' numbering system is reflected in maps

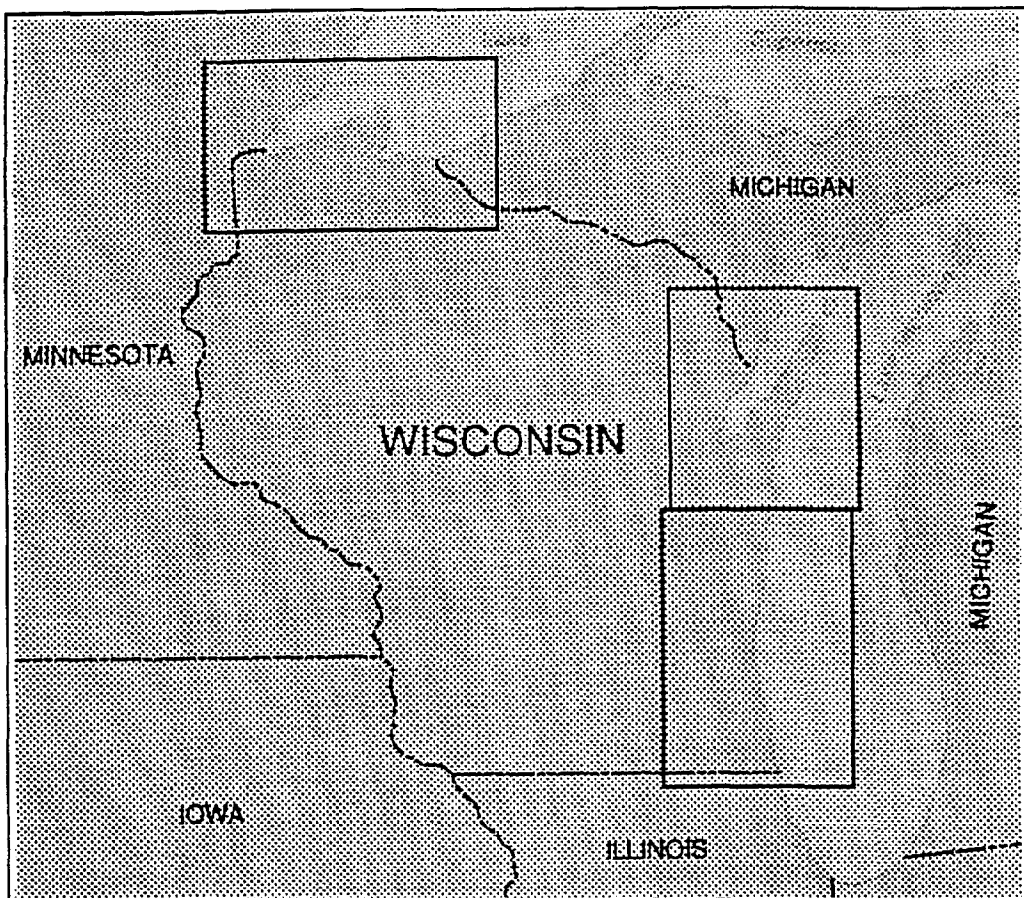

displayed on their facing page.

Each section also contains text describing highlights and special attractions to be found in that area. Vignettes about Great Lake history, wetlands, wildlife and the region's Native Americans have been included to enhance your enjoyment of the region.

Parking facilities in the table are keyed: large and small. Those listed as small hold a maximum of thirty vehicles; large parking facilities have room for more. In addition, some sites close at certain times. "Day Use Only" usually indicates that the site is open from sunrise to sunset. This may be the

case with some small boat launching facilities. The great majority of boat launching facilities are closed during the colder winter months.

In most cases, sites indicated as having shower facilities also have drinking water. Sites that have drinking water only are indicated. Restroom facilities at access points vary considerably, and range from modern accommodations to rustic outdoor facilities. Those locations indicated as having recreation areas provide space and/or facilities for at least three different activities.

The Great Lakes Circle Tour

As you travel along Wisconsin's eastern shore, you're tracing the route of the Lake Michigan Circle Tour. The tour spans 1,250 miles of coastline in four Great Lakes states: Wisconsin, Michigan, Illinois and Indiana.

Wisconsin's northern shoreline traces the route of the Lake Superior

Circle Tour, which extends along 1,300 miles of coastline in the Great Lakes states of Wisconsin, Minnesota and Michigan, as well as the province of Ontario, Canada.

Marked with distinctive green and white Circle Tour signs, the Lake Michigan Circle Tour and Lake Superior Circle Tour

are part of the 7,000-mile Great Lakes Circle Tour that now circumnavigates all five Great Lakes and the St. Lawrence Seaway.

So welcome to Wisconsin on the shores of the Great Lakes — America's Freshwater Coast!

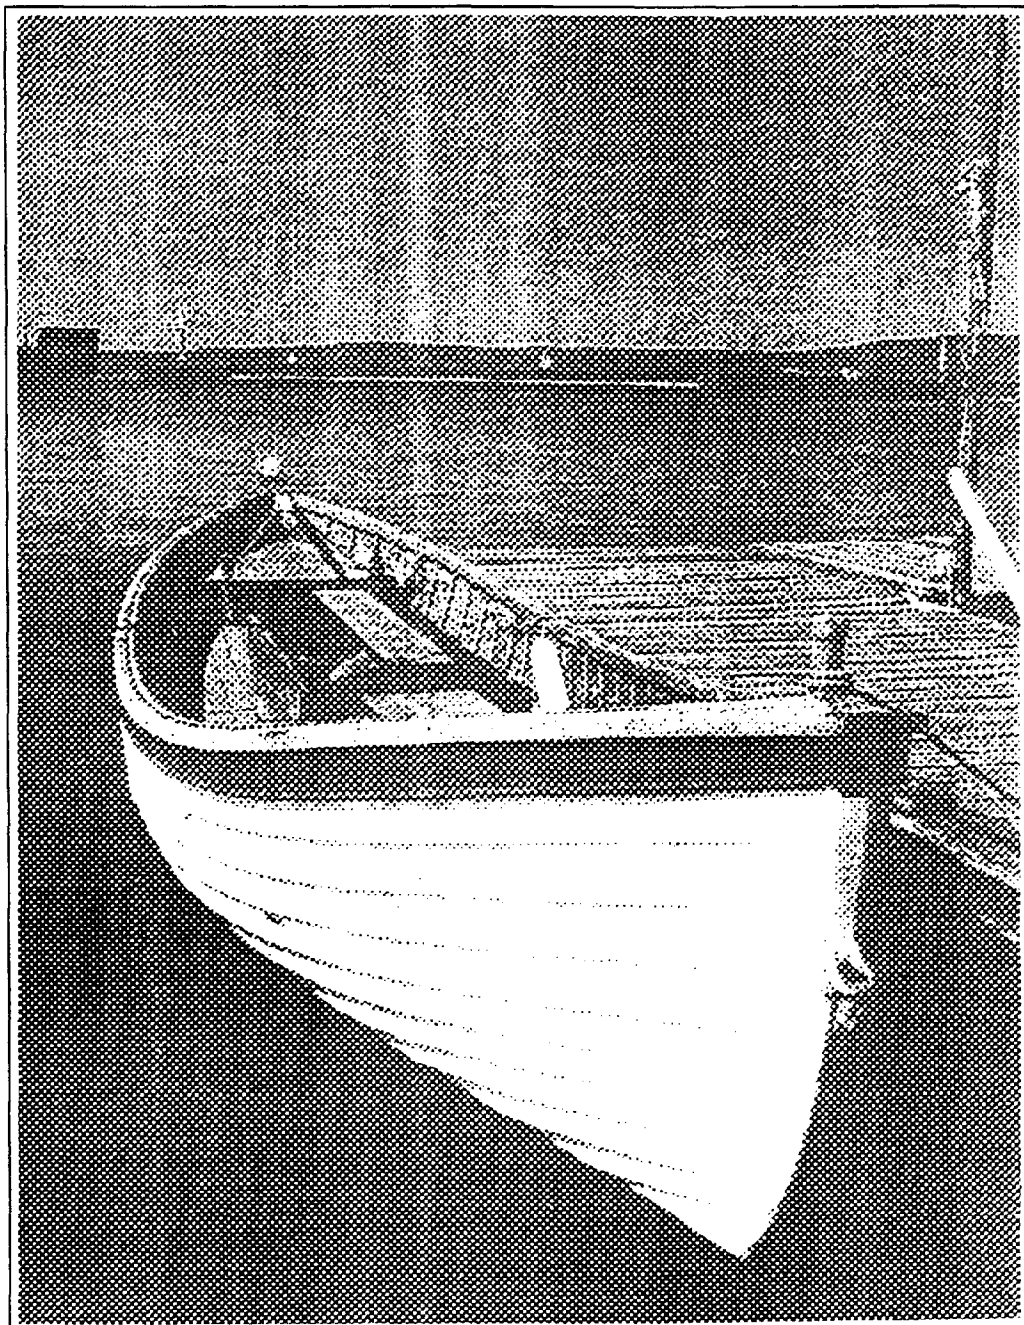

Introduction

The World's Greatest Lakes

Wisconsin has a magnificent and varied Great Lakes coast. Lake Superior's shore is lined with scenic bluffs, sandstone sea caves, islands and quaint fishing villages. The Lake Michigan coast is a potpourri of brilliant sunsets, lighthouses, fabulous sport fishing, long sandy beaches, blue-water sailing and fine state parks. Wisconsin's Great Lakes coasts offer unlimited recreational opportunities for millions of people.

A Gift of the Glaciers

On the scale of geologic time, the Great Lakes are very young – about 20,000 years old. They were born when mile-thick glaciers moved up and down the continent, gouging huge basins in the earth over thousands and thousands of years. As the last glaciers retreated, the basins filled with meltwater and rain and, after many more thousands of years, became the Great Lakes of today.

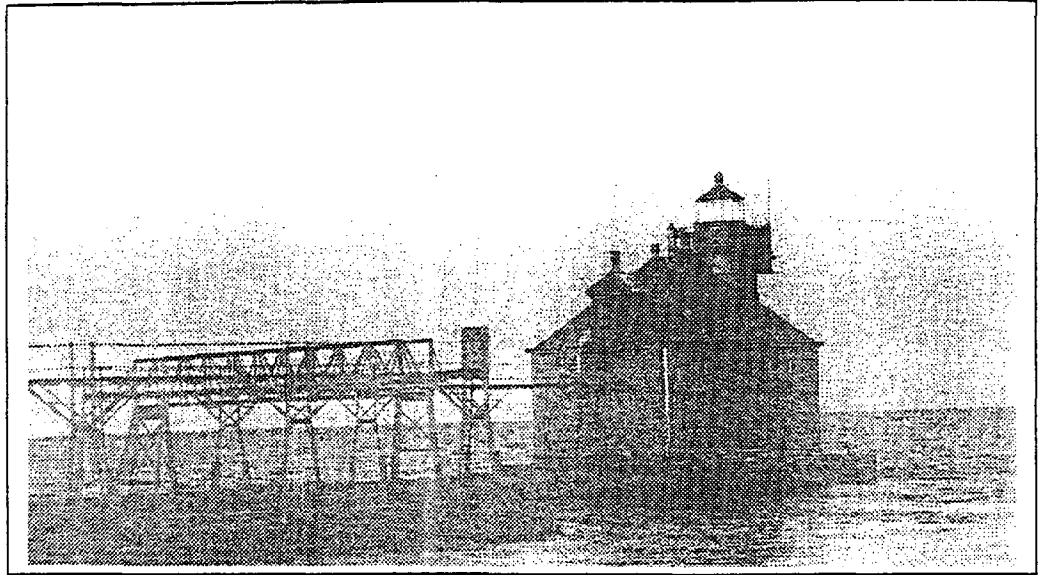

Bluewater traveler, Madeline Island

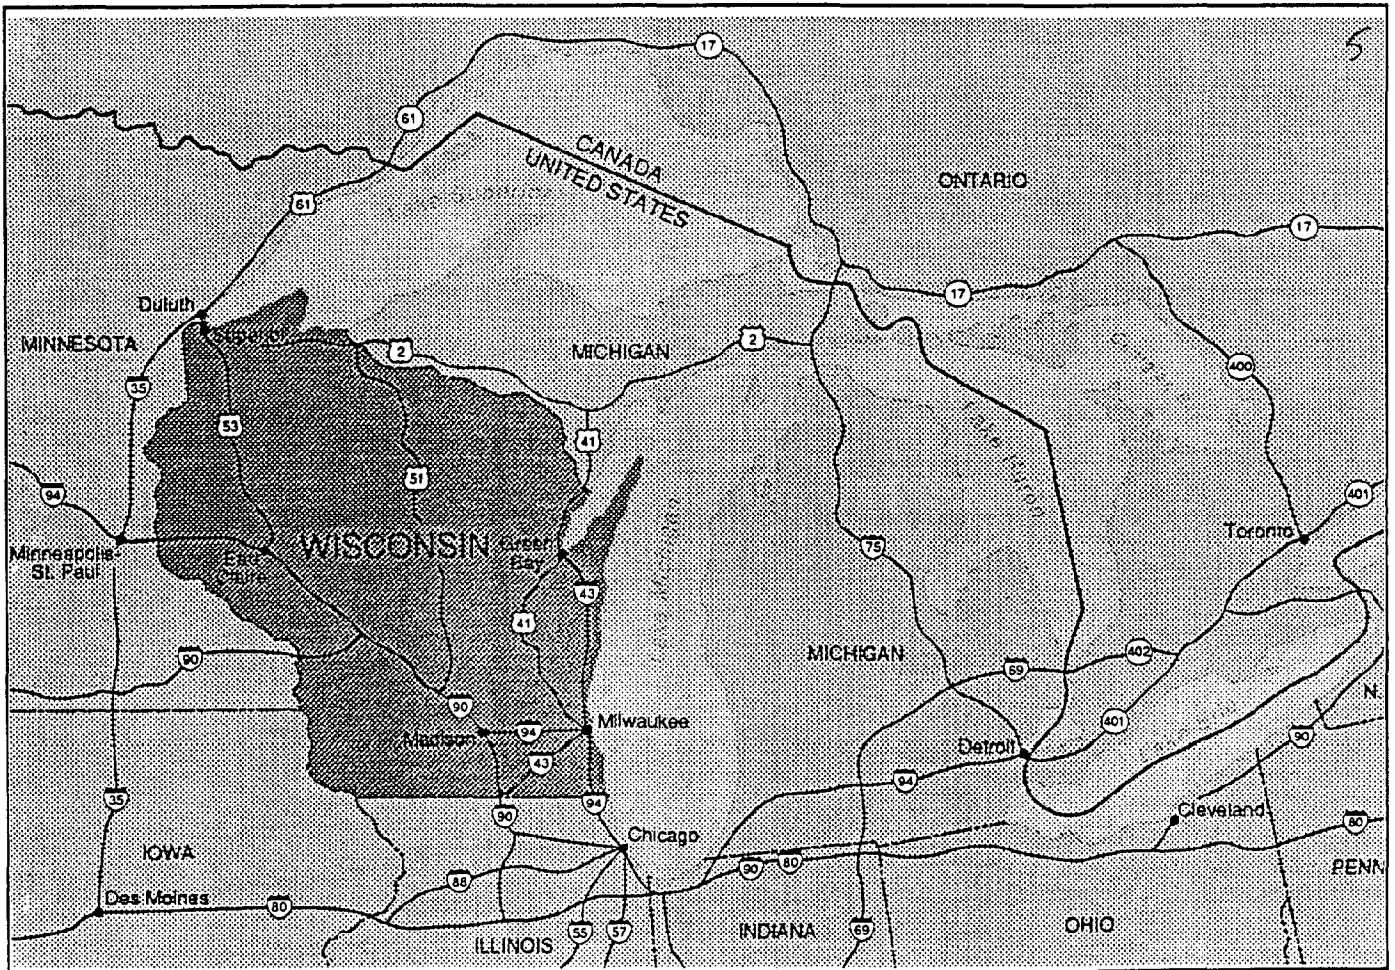

Together, the Great Lakes stretch a thousand miles across the continent, covering an area larger than New England. They contain one-fifth of all the surface freshwater on the planet, and flow eastward through the St. Lawrence River to the Atlantic.

Early Inhabitants

Small numbers of nomadic hunters inhabited the Great Lakes region as

Lighthouse, near Sturgeon Bay

Introduction

long as 11,000 years ago. In time, as populations grew, various cultures developed. Both the Copper Culture Indians (5000-1500 B.C.) and Effigy Mound builders (700-1300 A.D.) inhabited Wisconsin. The Indians who greeted the 17th century explorers were descendants of the late Woodland Indians – Chippewa, Menominee, Sauk, Fox, Miami and Potawatomi.

The French came to the Great Lakes seeking a route to the Orient. Etienne Brule reached western Lake Superior by 1622. Jean Nicolet stepped ashore in Wisconsin in 1634. The fur trade developed soon after, and lasted for 200 years.

*Jean Nicolet memorial,
Red Banks*

Many Wisconsin communities began as trading posts; Green Bay, Wisconsin's first city, rapidly became a major fur trading center.

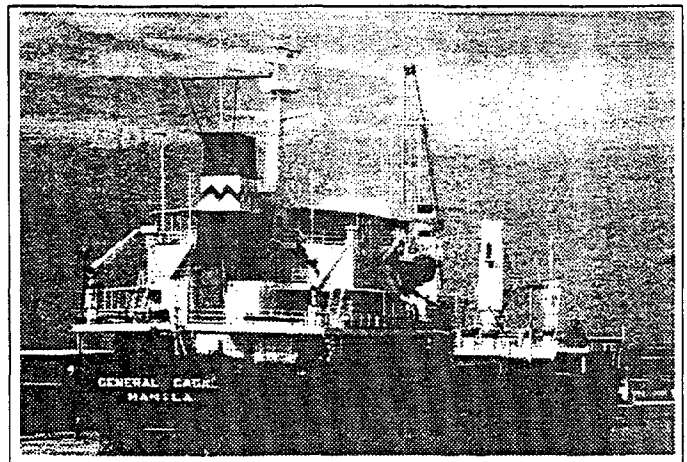

Early Great Lakes settlers found a land of boundless natural resources. Towns were built along the shoreline and a thriving commercial fishery was established. By 1840, Manitowoc was a burgeoning shipbuilding center, and Milwaukee and Green Bay were growing trade centers.

Great Lakes Shipping

As ships began carrying commodities and people between ports, the Great Lakes transportation system developed. Fleet, sharp-bowed "clipper ships" scurried between ports with cargos of all types. Elegant, side paddlewheel steamers made speedy runs westward from Buffalo, transporting passengers westward to the upper lakes. Combination cargo-passenger vessels, called "package freighters," began making regularly scheduled stops at lakeshore cities. The first propeller-driven steamer appeared in 1841.

Commercial fishing, Lake Michigan

International port-of-call, Green Bay

Resource management by the Wisconsin DNR

A directory of 1856 listed 238 steamers (118 of which were propeller-driven) and 1,149 sailing ships in service on the lakes. As the number of ships increased, so did the number of disasters. Storms and uncharted waters claimed many ships, crews and passengers. The early steamers were subject to boiler explosions, and the resulting fires claimed thousands of lives.

Beginning in the 1840s, hundreds of thousands of European emigrants poured into the lakes region, carving farms from the wilderness, building new towns and developing industry. Port cities swelled with new arrivals. Milwaukee welcomed 30,000 newcomers in 1850 alone. With the completion of the St. Marys River Ship Canal in 1855, linking Lake Superior to Lake Huron, Lake Superior's resources were opened to the world. Ashland and Superior became major iron ore shipping ports. By the turn of the century, Great Lakes resources — fish, lumber, iron ore, copper and grain were helping to feed, house, and industrialize a rapidly growing America.

Wisconsin's Great Lakes Resources Today

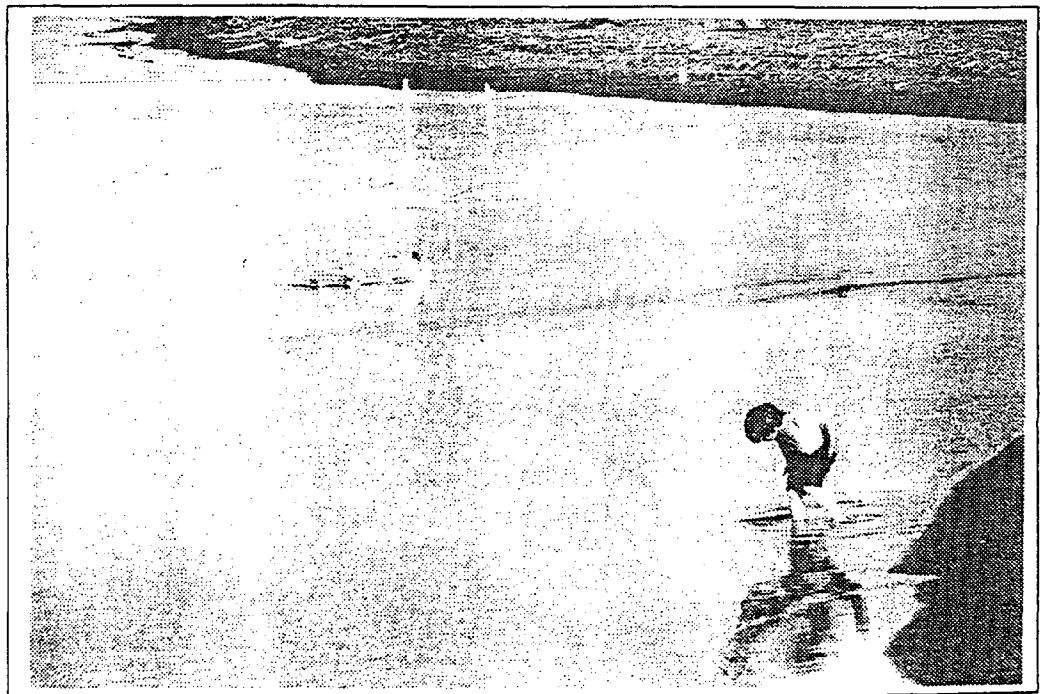

The freshwater of the Great Lakes is a unique natural resource, unequalled anywhere in the world. Water quality is exceptionally high, and Lakes Michigan and Superior provide drinking water for more than 70 communities. Municipalities, industry and electric power generating plants — both nuclear and fossil fuel — make extensive use of the waters.

Lake Michigan and Lake Superior wetlands provide habitat and food for vast numbers of fish, aquatic plants, fur-bearing animals and waterfowl. The Great Lakes sport fishery draws millions of anglers to the five lakes. Although greatly reduced from its early 20th-century peak, both Lake Michigan and Lake Superior support a commercial fishery that includes whitefish, chubs, perch, herring and smelt. Twenty-one Wisconsin commercial fishermen work Lake Superior; 123 fish Lake Michigan.

The lakes provide an efficient and inexpensive means of transporting bulk commodities. They are one

of the world's busiest waterways, handling millions of tons of cargo annually during an eight-month navigation season. With the completion of the St. Lawrence Seaway in 1959, the lakes were opened to ocean-going shipping: today ships from more than 50 nations call at Great Lakes ports.

Today, with some 50 million Americans and Canadians living in the Great Lakes basin, the lakes are under great pressure. Careful use will remain a critical factor in preserving this unique and highly valuable resource for future generations.

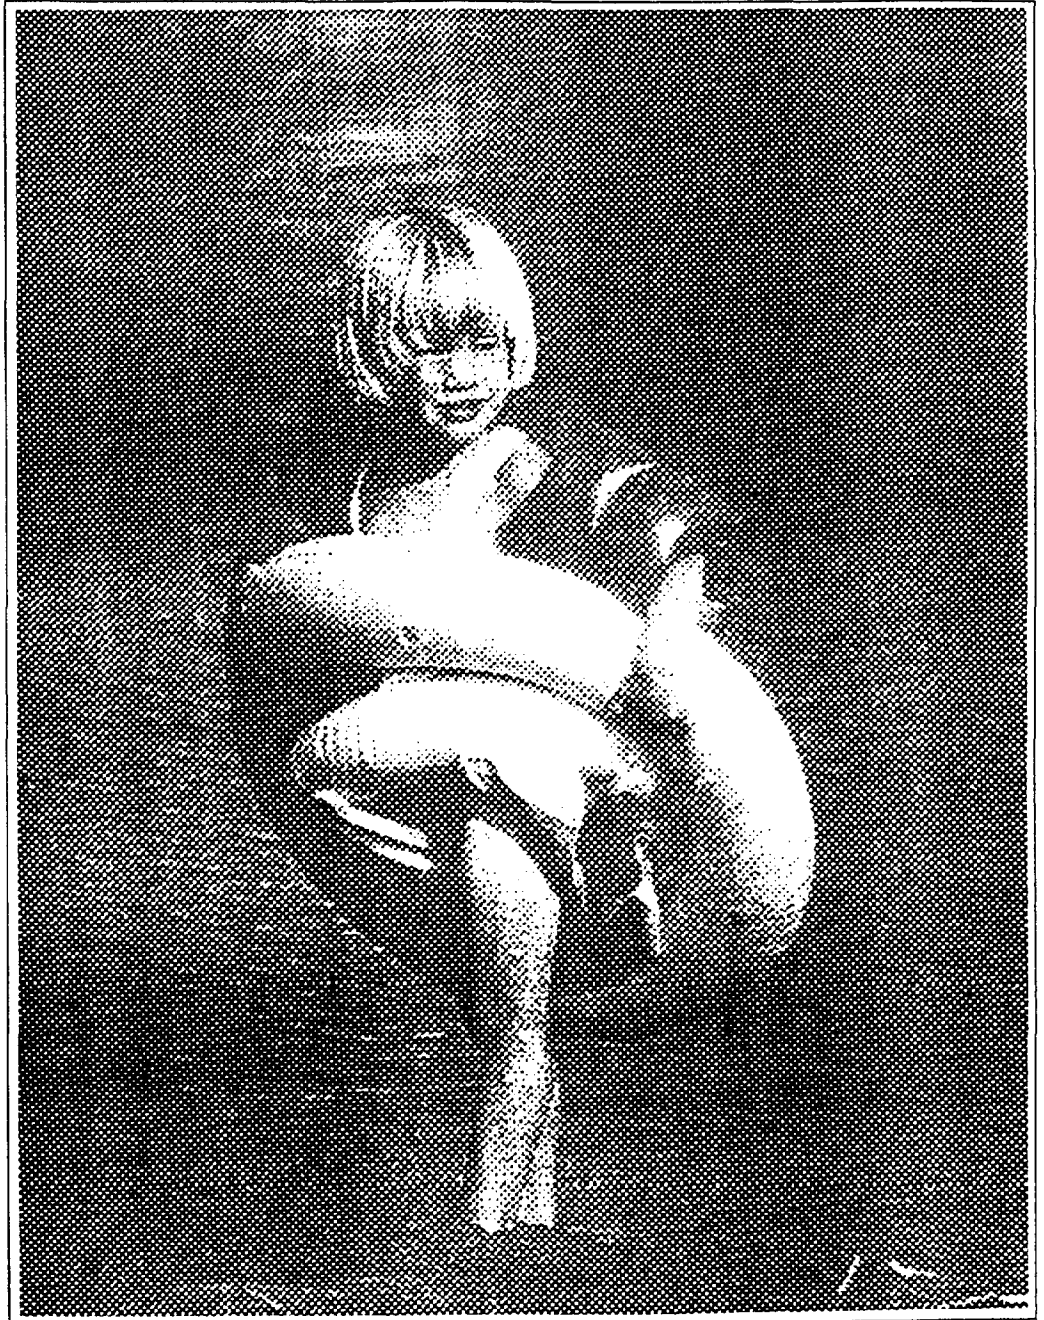

Wisconsin Point, Superior

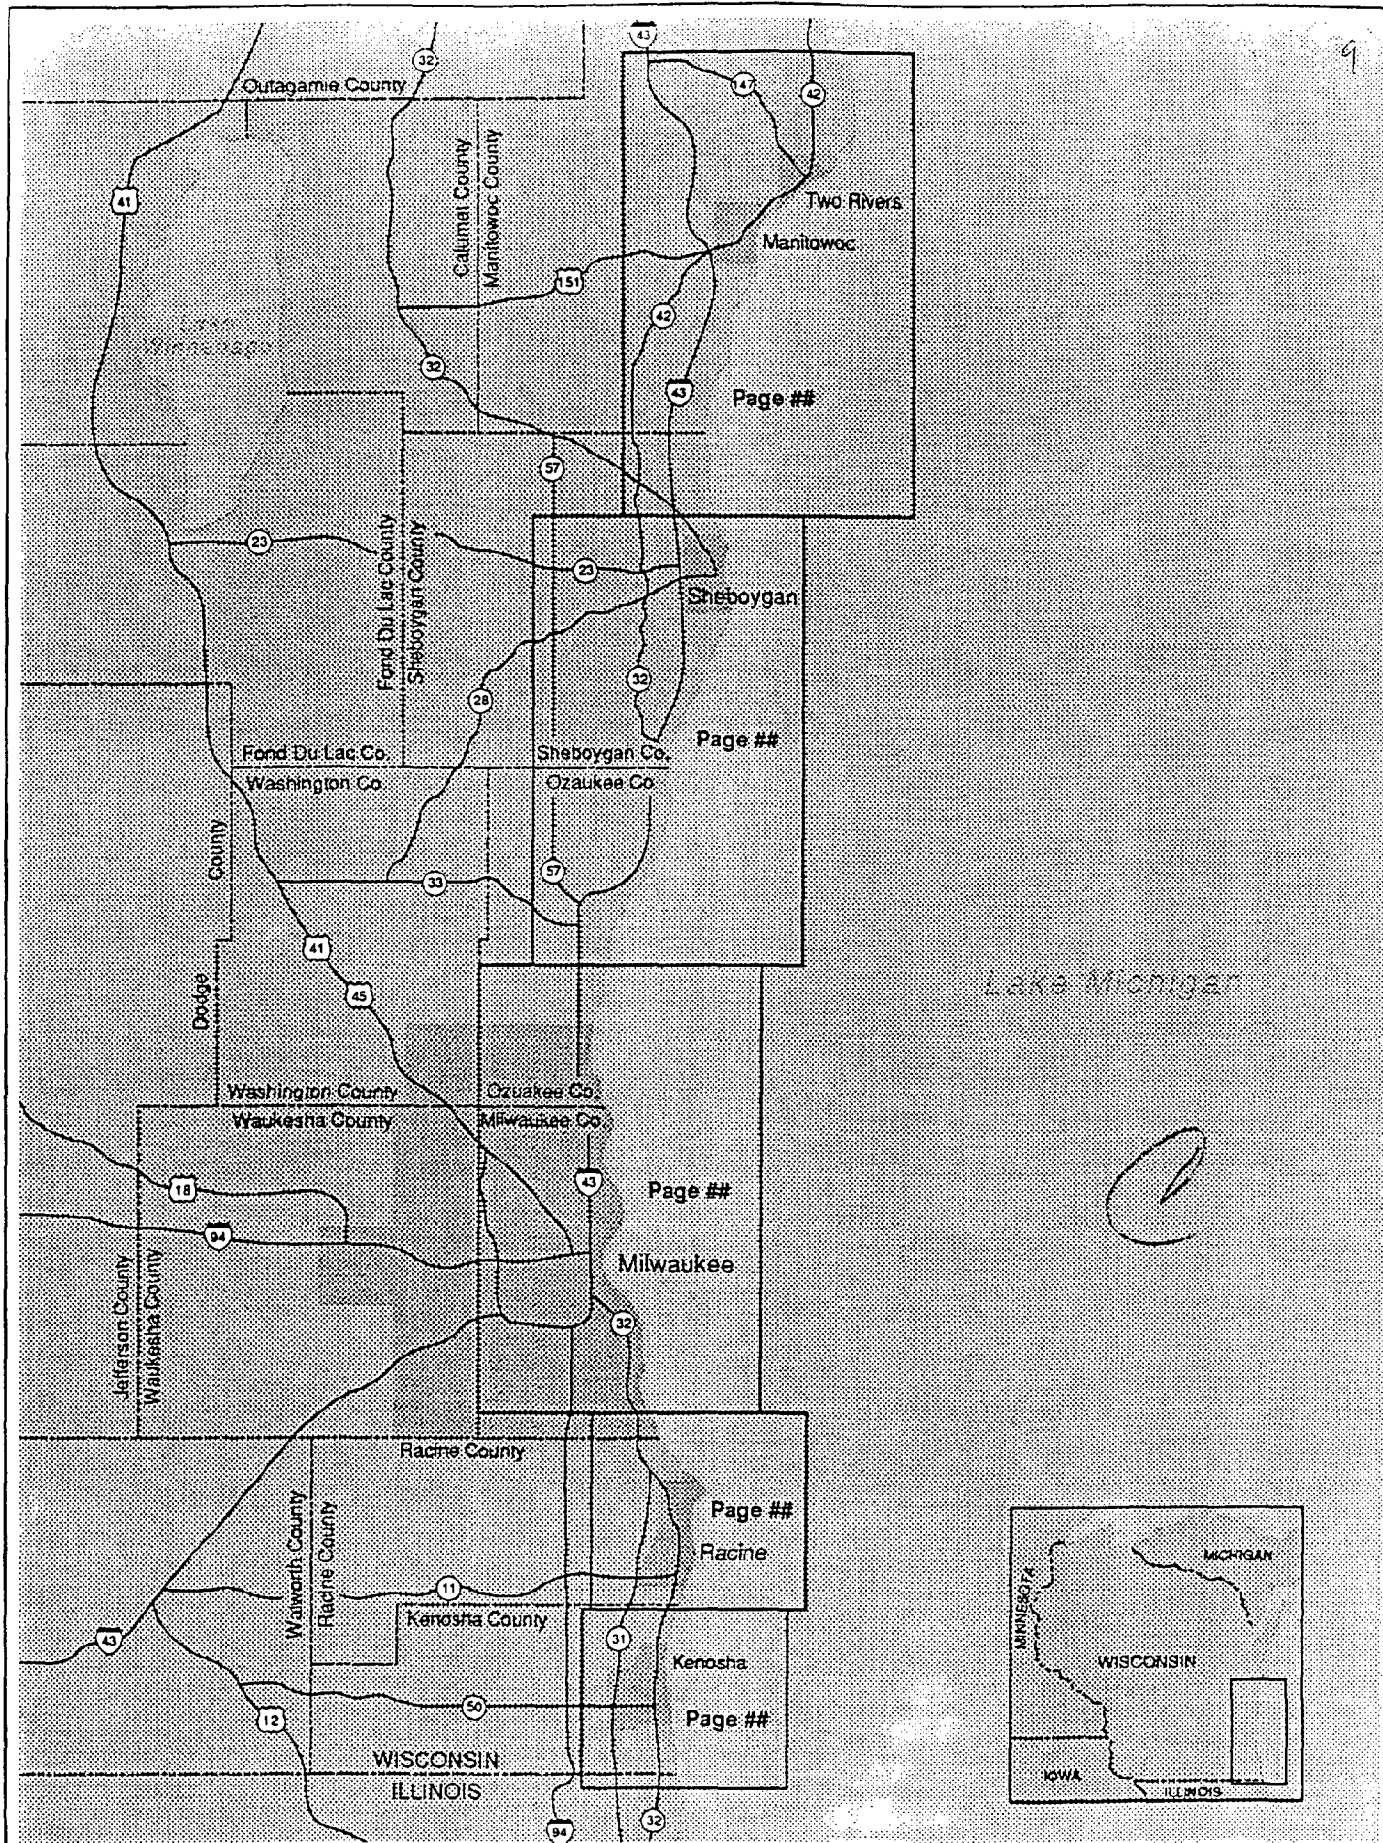

Southern Lake Michigan

Southern Lake Michigan is also bordered by Illinois, Indiana and lower Michigan. The lower lake, from Milwaukee around to Michigan, is one of the most heavily industrialized regions in the nation – totally dependent on an abundant and inexpensive supply of Great Lakes water.

Wisconsin's southern coast has high clay bluffs, but much of the shore consists of sand and pebble beaches that draw large numbers of people. The following pages list many southern Lake Michigan attractions to explore. With 87 public access sites between the Wisconsin-Illinois border and Two Rivers, there are many opportunities to enjoy the lake.

Charter fishing, Lake Michigan

Kenosha

Wisconsin's southern-most Lake Michigan port, **Kenosha** was first called Southport.

The beautiful new **Southport Marina** is the latest addition to the city's scenic waterfront. Kenosha is an excellent charter fishing port for Lake Michigan's deepwater trout and salmon; either in your own boat or with a professional charter captain.

Great Lakes Sidelites

Fish Stocking

Huge stocking programs maintain the Wisconsin sport fishery. In 1991, the state Department of Natural Resources stocked 2,143,000 coho and chinook salmon, 1,000,000 lake trout, and 1,895,000 brook, brown and steelhead trout in Lake Michigan.

Southern Lake Michigan

Kenosha CONTINUED

The city's annual **Bristol Renaissance Faire**, held weekends in July and August, recreates village life in Renaissance Europe with actors, mimes and artisans. Enjoy greyhound racing excitement at the all-new **Dairyland Greyhound Park!** The world-class facility has five restaurants, a sports lounge, and grandstand and clubhouse seating. Shopping opportunities abound at the **Kenosha Factory Outlet Center**, with more than 110 different stores. For more information, contact the **Kenosha Area Tourism Corporation**, 800 55th St., Kenosha, WI 53140; 414/654-7307; 800/654-7309.

Chiwaukee Prairie

A legacy of the Ice Age glaciers, Chiwaukee Prairie is considered the last unbroken stretch of prairie of its kind in Wisconsin. Encompassing a narrow expanse of Lake Michigan lakefront south of Kenosha, the prairie is home to more than 400 native plant species including the endangered prairie white-fringed orchard and the rare pink milkwort.

More than 75 species of birds have been recorded at Chiwaukee Prairie, including the upland sandpiper and king rail. Foxes and white-tailed deer are often seen.

Early Indians occupied the region. Artifacts from the Woodland and Upper Mississippi culture have been found. Protected as a National Natural Landmark and a State Natural Area, Chiwaukee Prairie is open to visitors for hiking and observation.

Great Lakes Sidelites

Lake Michigan

Lake Michigan is the third largest Great Lake and the sixth largest freshwater lake in the world. Extending 307 miles north to south and 118 miles east to west, the lake is 531 feet above sea level, with an average depth of 279 feet and a maximum depth of 923 feet. It is the only Great Lake that lies entirely within the United States. The Wisconsin coast is 407 miles long.

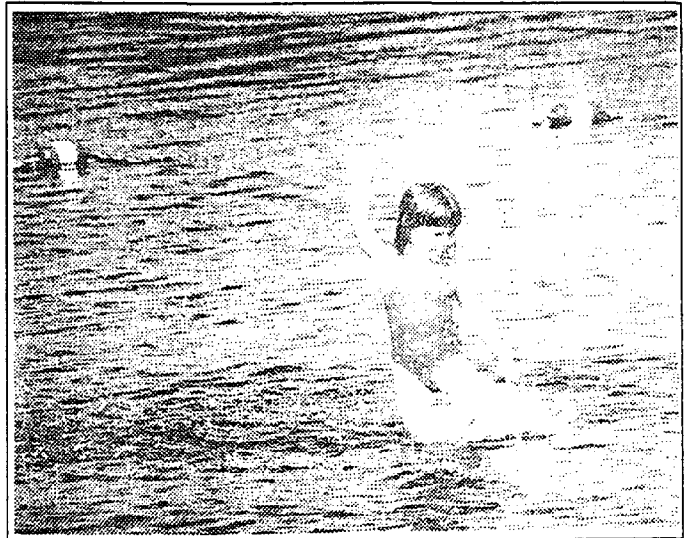

Southern Lake Michigan

Racine CONTINUED

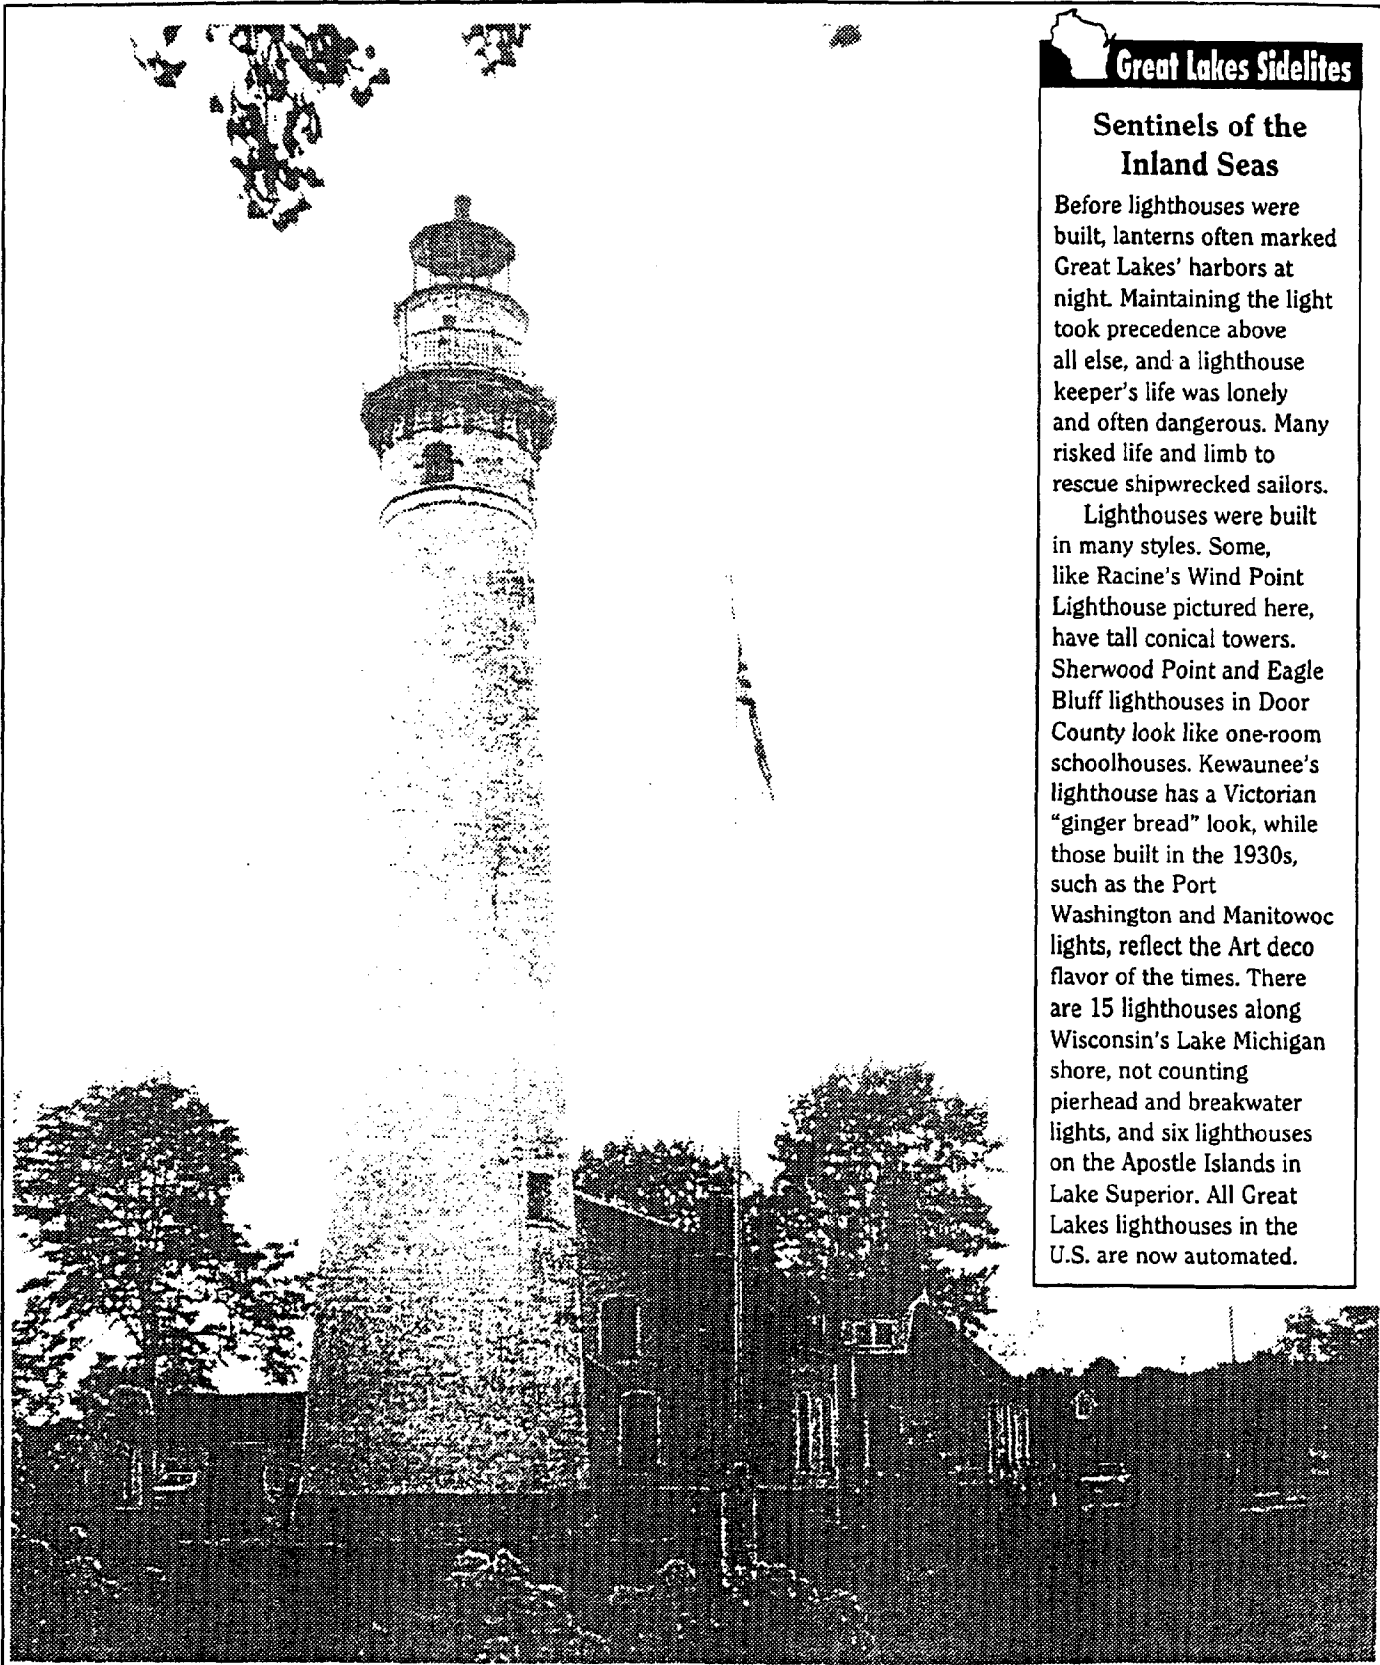

Salmon-a-Rama, held in July, is one of Lake Michigan's biggest fishing contests, attended by 300,000 anglers annually. Youngsters will enjoy the **Racine Zoological Park**, with 350 species of animals. The **Charles A. Wustum Museum of Fine Arts** has an excellent collection of artworks from the Federal Arts Program of the 1930s. Nearby, **Wind Point Lighthouse** is one of the tallest and most beautiful on Lake Michigan. For more information, contact the **Racine County Convention & Visitors Bureau**, 345 Main St., Racine, WI 53403; 414/634-3293, 800/272-2463.

Great Lakes Sidelites

Sentinels of the Inland Seas

Before lighthouses were built, lanterns often marked Great Lakes' harbors at night. Maintaining the light took precedence above all else, and a lighthouse keeper's life was lonely and often dangerous. Many risked life and limb to rescue shipwrecked sailors.

Lighthouses were built in many styles. Some, like Racine's Wind Point Lighthouse pictured here, have tall conical towers. Sherwood Point and Eagle Bluff lighthouses in Door County look like one-room schoolhouses. Kewaunee's lighthouse has a Victorian "ginger bread" look, while those built in the 1930s, such as the Port Washington and Manitowoc lights, reflect the Art deco flavor of the times. There are 15 lighthouses along Wisconsin's Lake Michigan shore, not counting pierhead and breakwater lights, and six lighthouses on the Apostle Islands in Lake Superior. All Great Lakes lighthouses in the U.S. are now automated.

Sport Fishing on the Big Lakes

Fishing is one of the most popular Great Lakes pastimes, drawing millions of anglers each year. Lake Michigan fishermen catch about 400,000 chinook and coho salmon each year, along with 100,000 lake trout and 60,000 rainbows. In Wisconsin's Lake Superior waters, fishermen take about 45,000 salmon and trout each year.

The success of sport fishing has created a large charter boat industry, with professional charter boat captains in every Wisconsin port ready to show you some of the finest fresh-water angling anywhere.

Port Washington

Port Washington is a premier sport fishing location, with many deepwater charter fishing boats. The anchor from the steamboat "Toledo," wrecked here in 1856, stands along the waterfront.

The Ozaukee County Courthouse is noted for its gold-plated dome and distinctive architecture. The Pebble House, dating from 1848, is built of perfectly aligned stones gathered from Lake Michigan beaches. Nearby,

Wetlands

Wetlands are areas where the water table occurs above the land surface for at least part of the year. Four basic types of wetlands are found in the Great Lakes region — swamps, marshes, bogs, and fens.

Wetlands are an important part of the Great Lakes ecosystem, helping to replenish groundwater supplies and reduce shoreline erosion. They also serve as natural sewage treatment systems, and provide habitat for many types of birds and animals.

Great Lakes Sidelites

The Manitowoc Submarines

During World War II, Manitowoc shipyards built 28 submarines for the U.S. Navy. After sea trials in Lake Michigan, the submarines were placed in floating dry docks and towed to New Orleans via the Illinois and Mississippi Rivers. Here, they were armed and sent to war.

Several Manitowoc submarines won combat honors. Four fell victim to enemy action, with a loss of 337 lives. The Manitowoc Maritime Museum's U.S.S. COBIA stands in tribute to all submariners who were lost during the war.

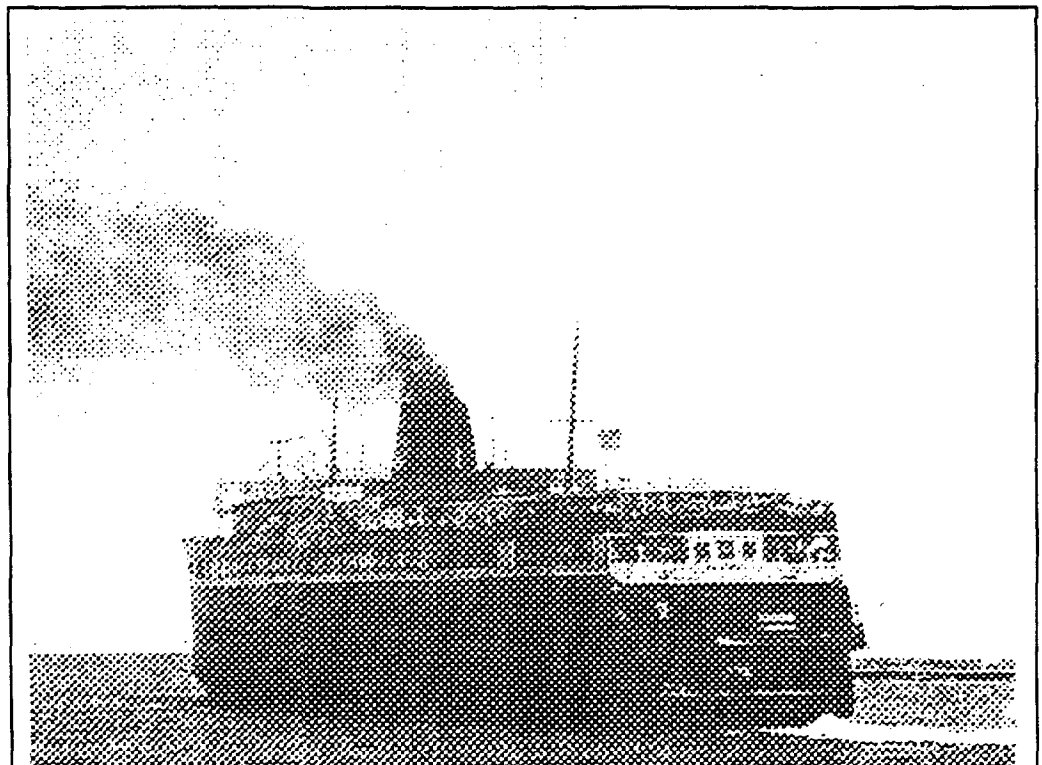

Two Rivers

Two Rivers is a commercial fishing port and sport fishing center. Historic **Rogers Street Fishing Village** displays early fishing and boating artifacts, a fishing tug and a restored lighthouse. The new **Great Lakes Coast Guard Museum** exhibits search and rescue equipment and the recovered cabin from the "Chinook."

The ice cream sundae was born in Two Rivers in 1881. There are several old-fashioned ice cream parlors, including **Berners Ice Cream Parlor**, in the restored 1850s Washington Hotel, which is now a museum.

Bird watchers will enjoy **Woodland Dunes Nature Center**, a bird-banding station and wildlife research area where more than 100 species of birds have been recorded. Nearby, **Point Beach State Forest** offers a long sand beach, camping, and an interpretive nature center. Rawley Point Lighthouse is within the park. At **Point Beach Energy Center**, near the Point Beach nuclear power plant, tour a model nuclear reactor and enjoy exciting hands-on displays of solar and wind energy. **Two Creeks Buried Forest**, part of the Ice Age National Scientific Reserve, preserves the remnants of a buried interglacial forest that is 12,000 years old.

For more information on the Two Rivers area, contact the **Two Rivers Historical Society**, 1622 Jefferson St., Two Rivers, WI 54241; 414/793-2490.

Great Lakes Sidelites

Lake Michigan's Ships

Sailing ships plied Lake Michigan for 160 years. Wisconsin shipyards built scores of wooden sailing ships. Between 1840 and 1899, Manitowoc shipyards alone turned out more than 100. The Great Lakes version of the famed "clipper ships," they had sharp, narrow bows and retractable center board keels, allowing them to operate in shallow waters.

As steel and steam began to replace wood and sail, steamers designed specifically for bulk commodities appeared in the 1880s. In 1899, the last full-rigged schooner built on the lakes was launched at Manitowoc. Still, the graceful sailing ships persevered, and the final voyage under sail was made in 1938 by the schooner "J. T. Wing."

Car ferries, which shuttled rail cars, passengers and later, automobiles, appeared in 1892. The car ferry "S.S. Badger" still operates on Lake Michigan, carrying passengers and autos from Manitowoc to Ludington, Michigan.

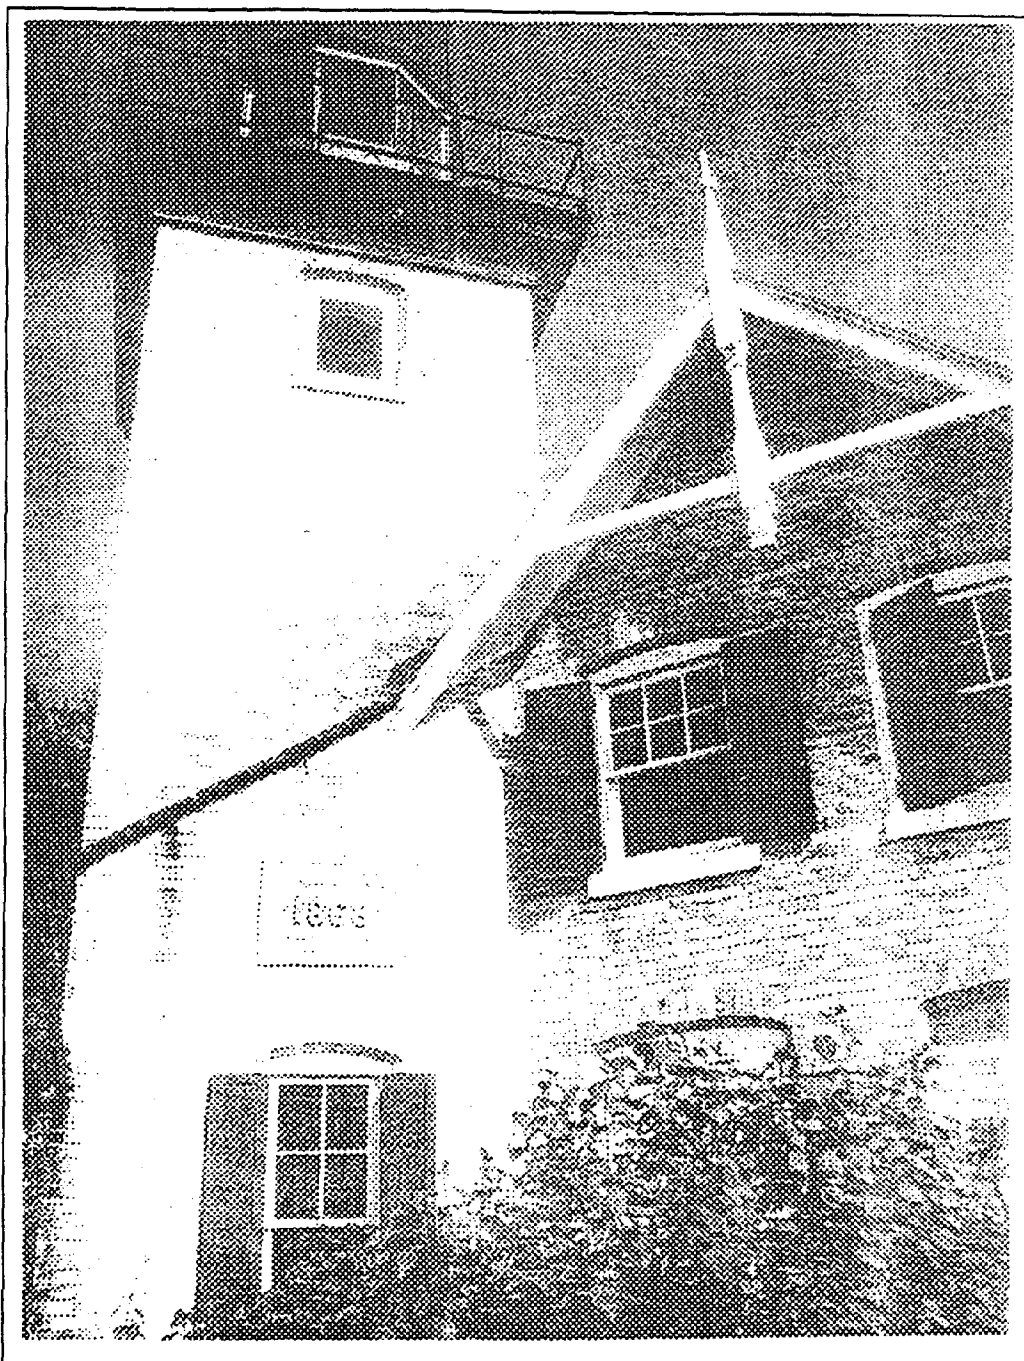

Northern Lake Michigan

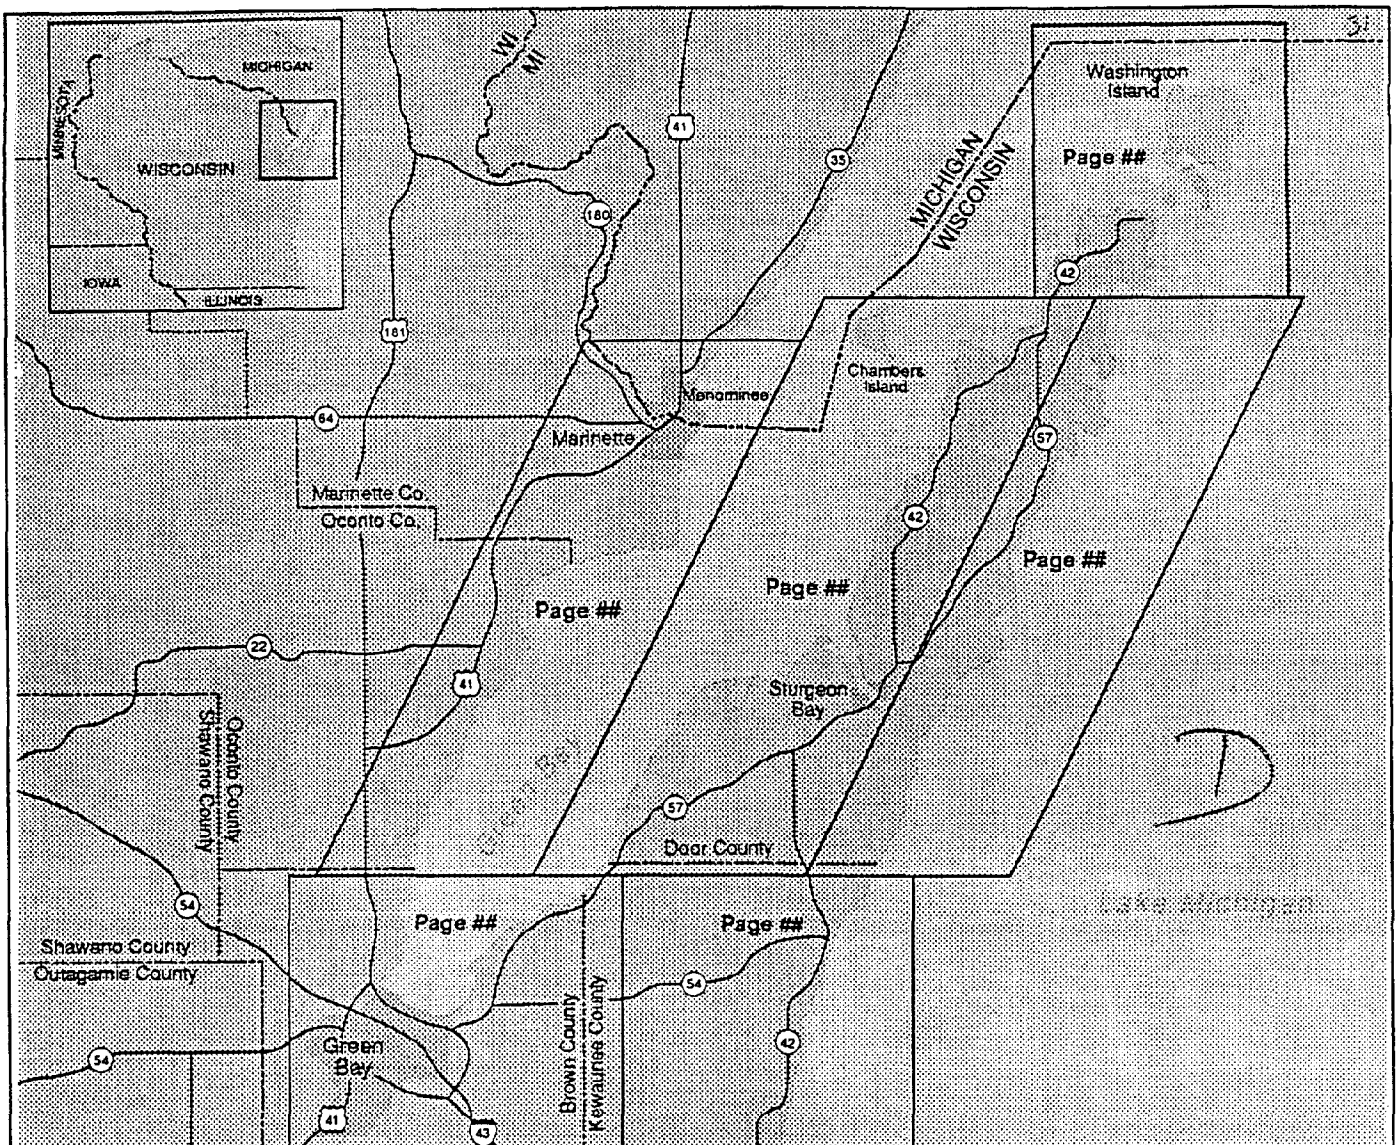

Northern Lake

Michigan's coast is marked by two prominent geographic features – the long Door County Peninsula and the beautiful bay of Green Bay, the second largest bay on the Great Lakes. The waters off the peninsula are strewn with islands including Washington Island and Rock Island – now a state park – where the explorer La Salle made landfall with his “Griffon” in 1679.

A favorite with blue-water sailors, Green Bay ranks as one of the most important water routes in North American history. The Fox River, which empties into the bay at the city of Green Bay, connects the Great Lakes with the Mississippi River by means of a short overland portage to the Wisconsin River. Marquette and Jolliet used this route on their journey of discovery in 1673. But long before and long after, Indians, missionaries, fur traders, and explorers followed the waterway into the heart of the North American continent.

Eagle Bluff Lighthouse, Peninsula State Park, Door County

The northern lake region is a unique blend of commerce and resource: where tourism and recreation flourish amid bluff and blue water. There are 120 public access points between Two Rivers and Marinette, providing many opportunities to explore these beautiful waters.

The Christmas Tree Ship

In November 1912, the schooner "Rouse Simmons" – loaded with Christmas trees – succumbed to a fierce Lake Michigan gale. When last seen off Kewaunee, the ship's sails were in tatters and distress signals were flying.

Months later, area fishermen found trees in their nets. In 1925, when a wallet belonging to the ship's captain was raised in a fisherman's net, the Christmas Tree Ship became part of Great Lakes folklore. Scuba divers discovered the "Simmons" wreckage between Kewaunee and Two Rivers in 1970 and, to this day her holds are filled with Christmas trees!

Jacksonport

This quiet Lake Michigan village straddles the 45th Parallel, exactly halfway between the equator and the North Pole. Nearby, **Whitefish Dunes State Park** has the highest sand dunes in the state, a wonderful sand beach, hiking and cross-country ski trails, and a nature center. Adjacent **Cave Point County Park** has a spectacular rocky shoreline with sea caves sculpted by the wind and Lake Michigan's waves.

Cave Point Park, near Valmy

Northern Lake Michigan

Along the waterfront, Baileys Harbor

Baileys Harbor

Founded by fishermen in 1851, Baileys Harbor is home to the **Ridges Sanctuary**, one of America's largest wildflower preserves, where all 23 species of orchids native to Wisconsin grow among other rare plant communities. The **Bjorklunden Chapel**,

a replica of a Norwegian Stavkirke (wooden church), offers tours by reservation. The **Cana Island Lighthouse**, built in 1869, remains an important navigational aid. A rocky causeway connects the island to the mainland when the water is low.

Great Lakes Sidelites

Toft Point

Encompassing more than 600 acres along the Lake Michigan coast near Baileys Harbor, Toft Point protects a diverse Great Lakes environment including rocky shoreline, marshes, ridges and swales, and forest lands.

Toft Point is home to a number of rare orchids and several species of forest birds including the red-breasted nuthatch, olive-sided fly-catcher, and winter wren.

Designated as a State Natural Area and a National Natural Landmark, Toft Point is owned and managed by the University of Wisconsin-Green Bay.

Great Lakes Sidelites

Door County

Door County is the long peninsula that juts into Lake Michigan like the thumb of a mitten.

Bordered by the bay of Green Bay on the west and Lake Michigan on the east, Door County provides wonderful opportunities for deepwater fishing. The waters of Green Bay offer some of the best deepwater sailing on the Great Lakes. Both captained and bareboat charters are available at ports all along the peninsula.

Door County has 250 miles of scenic coastline, with sparkling sand beaches, emerald islands, lighthouses and state parks. The county has a rich fishing and shipbuilding heritage and is world-famous for its cherry and apple orchards. No visit is complete without sampling a piece of Door County cherry pie and a Door County fish boil.

For a complete guide to Door County attractions, contact the **Door County Chamber of Commerce**, P.O. Box 406, Sturgeon Bay 54235-0406; 414/743-4456; 800/52-RELAX.

Washington Island passenger ferry, Gills Rock

Gills Rock

The village lies at the very tip of the peninsula's "thumb." The **Door County Maritime Museum** has artifacts relating to fishing and shipbuilding; exhibits include a real fishing tug.

The **Island Clipper** and **Yankee Clipper** offer narrated passenger service

from Gills Rock to Washington Island. The **Washington Island Ferry** provides year-round service (autos and passengers) to the island. Along with **C.G. Richter Passenger Cruises**, the ferry docks at nearby Northport Pier. Nearby, **Newport State Park** is a semi-wilderness park

offering swimming, backpack camping, ski touring, snowshoeing and picnicking. The park is an area of exceptional beach beauty with 11 miles of Lake Michigan shoreline.

Northern Lake Michigan

Washington Island

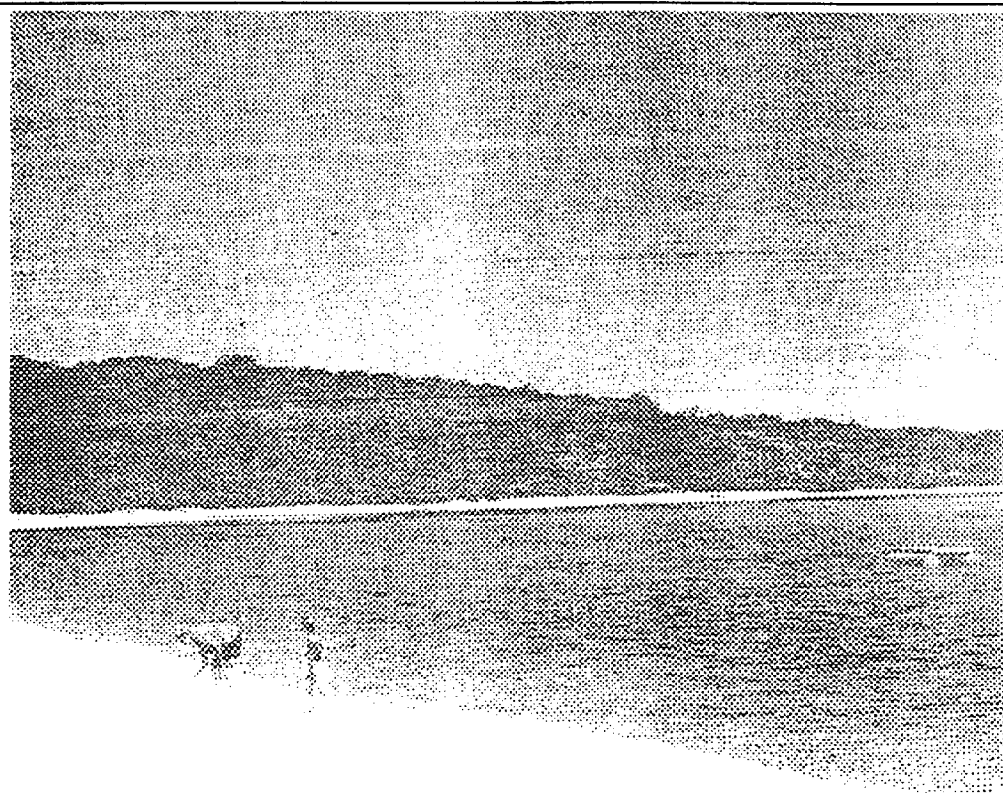

Washington Island is the largest Icelandic settlement in the United States and celebrates its heritage with an annual Scandinavian Festival in early August. Narrated tours of the island are available aboard **Cherry Train Tours**, **Viking Tour Train** or the **Island Trolley**. Visit the **Art and Nature Center** and **Jacobsen's**

Museum, a log cabin built in 1931 to exhibit Indian relics and natural history items. The new **Jackson Harbor Maritime Museum** has maritime and fishing artifacts.

Rock Island

A small passenger ferry from Washington Island to Rock Island departs from Jackson Harbor. **Rock Island State Park** is a primitive park permitting only hiking and backpack camping. No vehicles of any kind are allowed on the island. Exhibits in the

park's castle-like **Viking Hall** include original furniture from the estate of **Chester Thordarson**, a millionaire inventor who once owned the island and built several massive buildings using beach stones.

Great Lakes Sidelites

Jackson Harbor Ridges

Located along the northeast corner of Washington Island, the Jackson Harbor Ridges preserve a variety of natural communities including beach, sand dunes and conifer forest. A number of northern plant types are found here including the rare dwarf lake orchid, arctic primrose and dune goldenrod, along with white cedar, fir and spruce trees.

Most of the small preserve is devoted to biological and wildlife study. There is a nature trail and a swimming beach.

Ellison Bay

Set in the peninsula's "Top O' the Thumb" region, **Ellison Bay** is home to many artists, potters, and craftspeople who welcome visitors to their shops and galleries. The view from Garrett Bluff is one of the most spectacular on all of Green Bay. **The Clearing**, originally the summer home of prominent American landscape architect Jens Jensen, is located here.

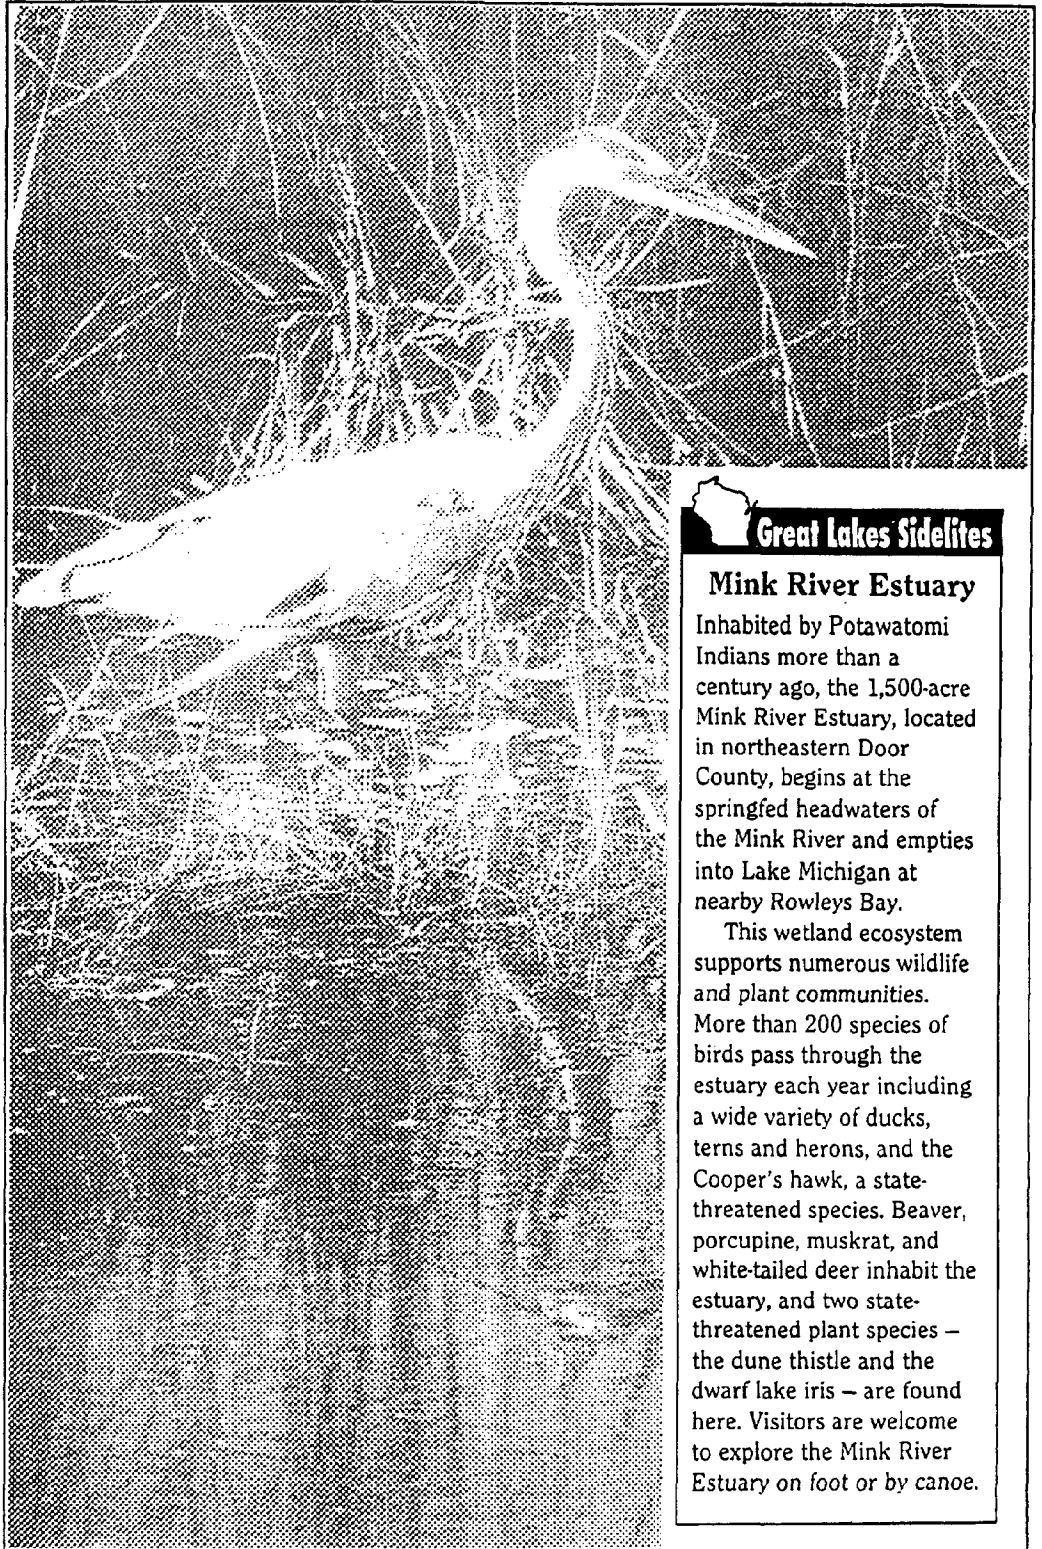

Great Lakes Sidelites

Porte des Morts (Death's Door)

Porte des Morts is the passage between the tip of the Door County Peninsula and Washington Island. The coastline here is rockbound, high limestone bluffs with offshore shoals and rocky islands. There is a strong current setting in or out, depending on the direction of the wind, and is sometimes so strong that sailing vessels cannot make headway against it.

Many vessels have been lost in the "Door." Between 1872 and 1889, shipwrecks averaged two per week. A storm in October 1880 drove 30 vessels ashore, with the loss of many lives. The legend attached to the name goes back to early French accounts of a large party of Indians drowned in a sudden fierce storm in "Death's Door."

Great Lakes Sidelites

Mink River Estuary

Inhabited by Potawatomi Indians more than a century ago, the 1,500-acre Mink River Estuary, located in northeastern Door County, begins at the springfed headwaters of the Mink River and empties into Lake Michigan at nearby Rowleys Bay.

This wetland ecosystem supports numerous wildlife and plant communities. More than 200 species of birds pass through the estuary each year including a wide variety of ducks, terns and herons, and the Cooper's hawk, a state-threatened species. Beaver, porcupine, muskrat, and white-tailed deer inhabit the estuary, and two state-threatened plant species – the dune thistle and the dwarf lake iris – are found here. Visitors are welcome to explore the Mink River Estuary on foot or by canoe.

Northern Lake Michigan

Sister Bay

Sister Bay is a bustling resort community with a large number of shops, boutiques, galleries and artist's studios. Tour the **Old Log Cabin Schoolhouse**, the oldest schoolhouse in northern Door County. Saddle up at **Caroles' Corral/Vacationland Farm Zoo**, a riding stable and petting zoo offering trail rides and

hayrides. **Concert Cruises** offers dinner cruises with classical, jazz, and folk music.

Ephraim

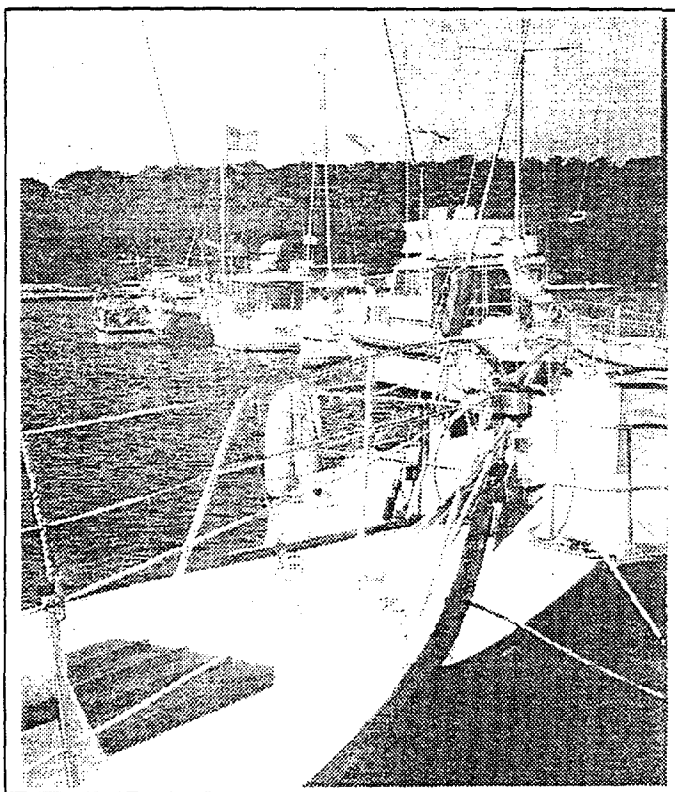

Founded in 1853 by Moravians from Norway, the resort village is a favorite of windsurfers and sailors. Visit the **Anderson Barn Museum** to see photos and early artifacts, and stroll the meandering

path along the scenic waterfront.

Ephraim is at the northern entrance to spectacular **Peninsula State Park**. Situated on a high bluff overlooking Green Bay, the park offers beachside camping, hiking, bicycling and cross-country skiing. Tour the **Eagle Bluff Lighthouse** or play the beautiful state-owned **Peninsula Park Golf Course**.

Egg Harbor

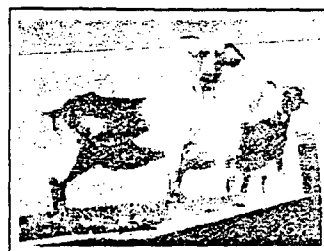

The resort village offers a smorgasbord of arts and craft shops and gift stores. The **Birch Creek Music Center** presents pops, light classical and big band performances with featured soloists and guest conductors. Youngsters will love **Thumb Fun Park** with its exciting rides and attractions.

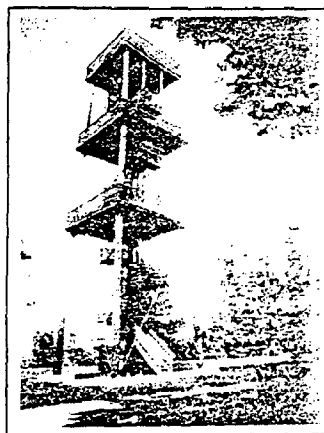

Sister Bay yacht harbor

Fish Creek

Located at the south entrance to Peninsula State Park, bustling Fish Creek is a hub of cultural and recreational activities with many interesting shops and galleries. The **Peninsula Players**, the oldest professional resident summer theater company in the country, presents Broadway and off-Broadway fare. **American Folklore Theater** offers summer musicales in Peninsula State Park.

Roof-top goats at a Sister Bay restaurant

Peninsula State Park, Door County

Cherry harvest, Door County

Sturgeon Bay

Sturgeon Bay is one of the largest shipbuilding ports on the Great Lakes, where Naval ships, racing craft and luxury yachts are built. In summer, tour boats provide close-up views of Great Lakes vessels in the Sturgeon Bay and Lake Michigan Ship Canal and along the peninsula's scenic shores. Exhibits at the **Door County Maritime Museum** recall the county's marine history.

Visit the **Door County Museum** to see collections of local history items. The **Miller Art Center** offers changing exhibits of regional art. Nearby, **Potawatomi State Park** provides great views from its observation tower. Camping, hiking, picnicking and downhill skiing add to the attractions at this fine park.

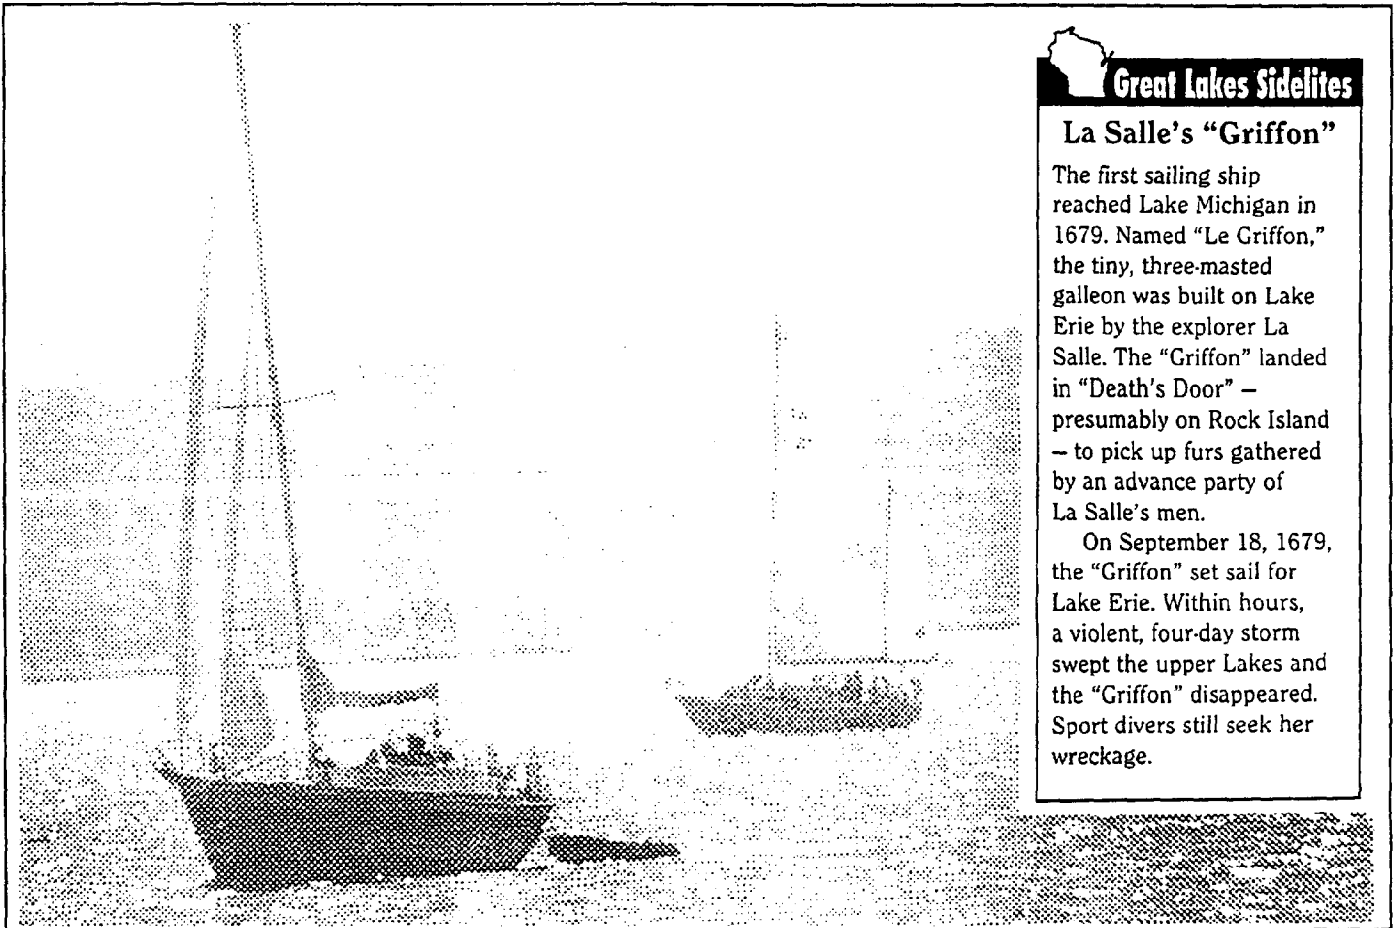

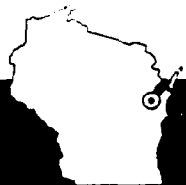

Great Lakes Sidelites

La Salle's "Griffon"

The first sailing ship reached Lake Michigan in 1679. Named "Le Griffon," the tiny, three-masted galleon was built on Lake Erie by the explorer La Salle. The "Griffon" landed in "Death's Door" – presumably on Rock Island – to pick up furs gathered by an advance party of La Salle's men.

On September 18, 1679, the "Griffon" set sail for Lake Erie. Within hours, a violent, four-day storm swept the upper Lakes and the "Griffon" disappeared. Sport divers still seek her wreckage.

Green Bay Packer Hall of Fame

Green Bay

Wisconsin's oldest city is perhaps most famous as the home of the Green Bay Packers. The **Green Bay Packers Hall of Fame** has exhibits honoring the hometown favorites. Arrangements can be made for a "behind the scenes" tour of historic **Lambeau Field**. Rail fans will enjoy the **National Railroad Museum**, with nearly 80 railroad cars and locomotives, a huge model railroad layout and vintage train rides. **Heritage Hill State Park** is a 40-acre complex of furnished historic buildings staffed by costumed interpreters.

The **Neville Public Museum** offers exhibits on the natural history, Indian culture, pioneer life, and development of transportation, industry and technology in Northeastern Wisconsin. Along the lakefront, **Bay Beach Wildlife Sanctuary** is a family favorite, with live native Wisconsin animals, a beautiful nature center with hands-on exhibits and miles of hiking and cross-country ski trails. Endangered species, including common terns and Fosters terns, use the sanctuary. Nearby, **Bay**

Beach Amusement Park will thrill youngsters with its rides and concessions. Most rides are only a dime! The **Oneida Nation Museum** tells the story of the "People of the Standing Stone," recalling the Oneida people's proud heritage with many exhibits.

Suamico

The **Barkhausen Waterfowl Preserve**, a wildlife management area on the west shore of Green Bay, offers a nature center, picnic areas, hiking and cross-country ski trails.

There's more family fun at the 1,600-acre **Brown County Reforestation Camp**, with a zoo, an educational center, picnic areas, fishing, an observation tower, hiking and cross-country ski trails. Visit **Vickery Village**, a complex of shops in seven restored historic buildings.

For more information on Green Bay and Suamico area attractions and events, contact the **Green Bay Visitor & Convention Bureau**, 1901 S. Oneida St., P.O. Box 10596, Green Bay 54307-0596; 414/494-9507, 800/236-EXPO.

Green Bay West Shores Wildlife Area

Stretching from the city of Green Bay to the Peshtigo River, this area encompasses thousands of acres of marshes and wetlands that protect the fragile shoreline and preserve wildlife habitat for nearly 50 species of animals and more than 350 species of birds. Vast numbers of Canada geese, tundra swan, ducks and other waterfowl gather during the spring and fall migrations.

Hérons, terns, cormorants and songbirds are also seen. There are several access points, or wildlife can be viewed from a canoe or skiff.

Great Lakes Sidelites

The Peshtigo Fire

On October 8, 1871, smoldering fires in the forests flared into the greatest fire disaster in American history, destroying hundreds of thousands of acres of forest along the west shore of Green Bay and completely leveling the community of Peshtigo. The fire claimed over 1,000 lives. Local histories carry accounts of pigs roasted in the fields where they stood and potatoes baked in the ground. The Peshtigo Fire was far worse than the "Great Chicago Fire," which occurred on the same day, but which has always overshadowed the Peshtigo fire in the history books. To find out more about the great fire, visit the Peshtigo Fire Museum in Peshtigo.

Great Lakes Sidelites

Timber "Down-River"

Wisconsin's early settlers found an endless forest of pines and hardwoods. Known to lumbermen as the "pinery," the Wisconsin forest stretched northward from Sheboygan, around the top of Lake Michigan and westward along Lake Superior's shores into Canada.

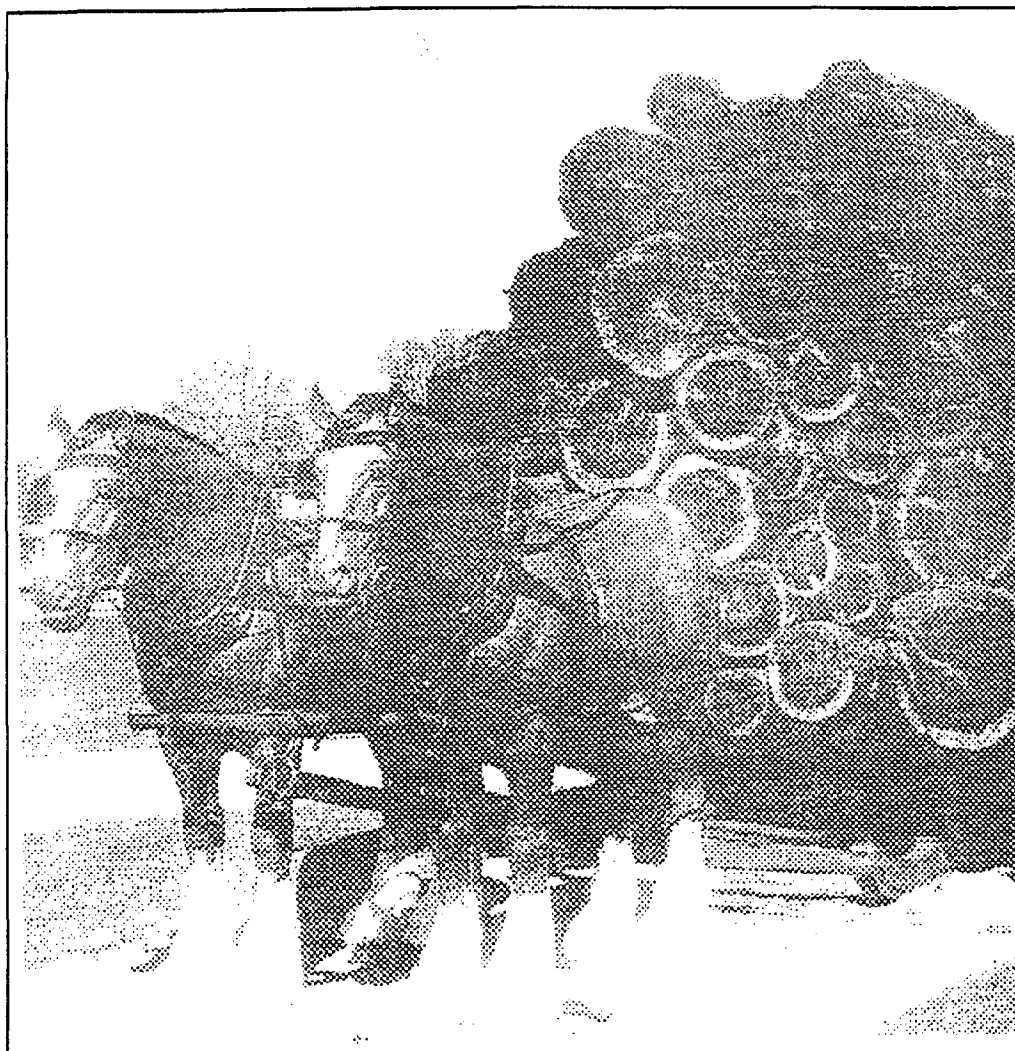

Nature provided the lumbermen with a delivery system as well as fine timber stands. Logs cut inland were floated down rivers and streams running into the lakes, where they were sawed into lumber and loaded on ships – later rail cars – for delivery to Chicago, the Midwest's principal lumbering center.

Great Lakes Sidelites

Wisconsin's Logging Era

In Wisconsin, logging operations began along Lake Michigan in the 1830s and peaked at the end of the 19th century. Lumbering along Wisconsin's Lake Superior shore began in the 1870s.

The amount of timber taken from the Wisconsin pinery is staggering. The western and northern shores of Green Bay alone produced 20 billion board feet, which, if cut into boards one inch thick and one foot wide and placed end to end, would circle the globe 14 times. An estimated 10 billion board feet of lumber came down the Menominee River at Marinette. In 1899 alone, 425 million board feet of lumber was shipped through Superior and Duluth.

Marinette

A busy port city located at the mouth of the Menominee River, Marinette has many recreational resources, including charter fishing opportunities for trophy lake trout and salmon.

Marinette was once called the "White Pine Capital of the World," where 20 sawmills lined the river. To learn more about

the city's logging heritage, visit the **Marinette County Logging Museum**, which has a wealth of photographs, artifacts and memorabilia. At **Scott Worldwide**, one of the nation's largest paper producers, watch the papermaking process from pulp logs to finished product. For more information, contact the

Marinette Chamber of Commerce, 601 Marinette Ave., P.O. Box 512, Marinette 54143; 715/735-6681, 800/236-6681.

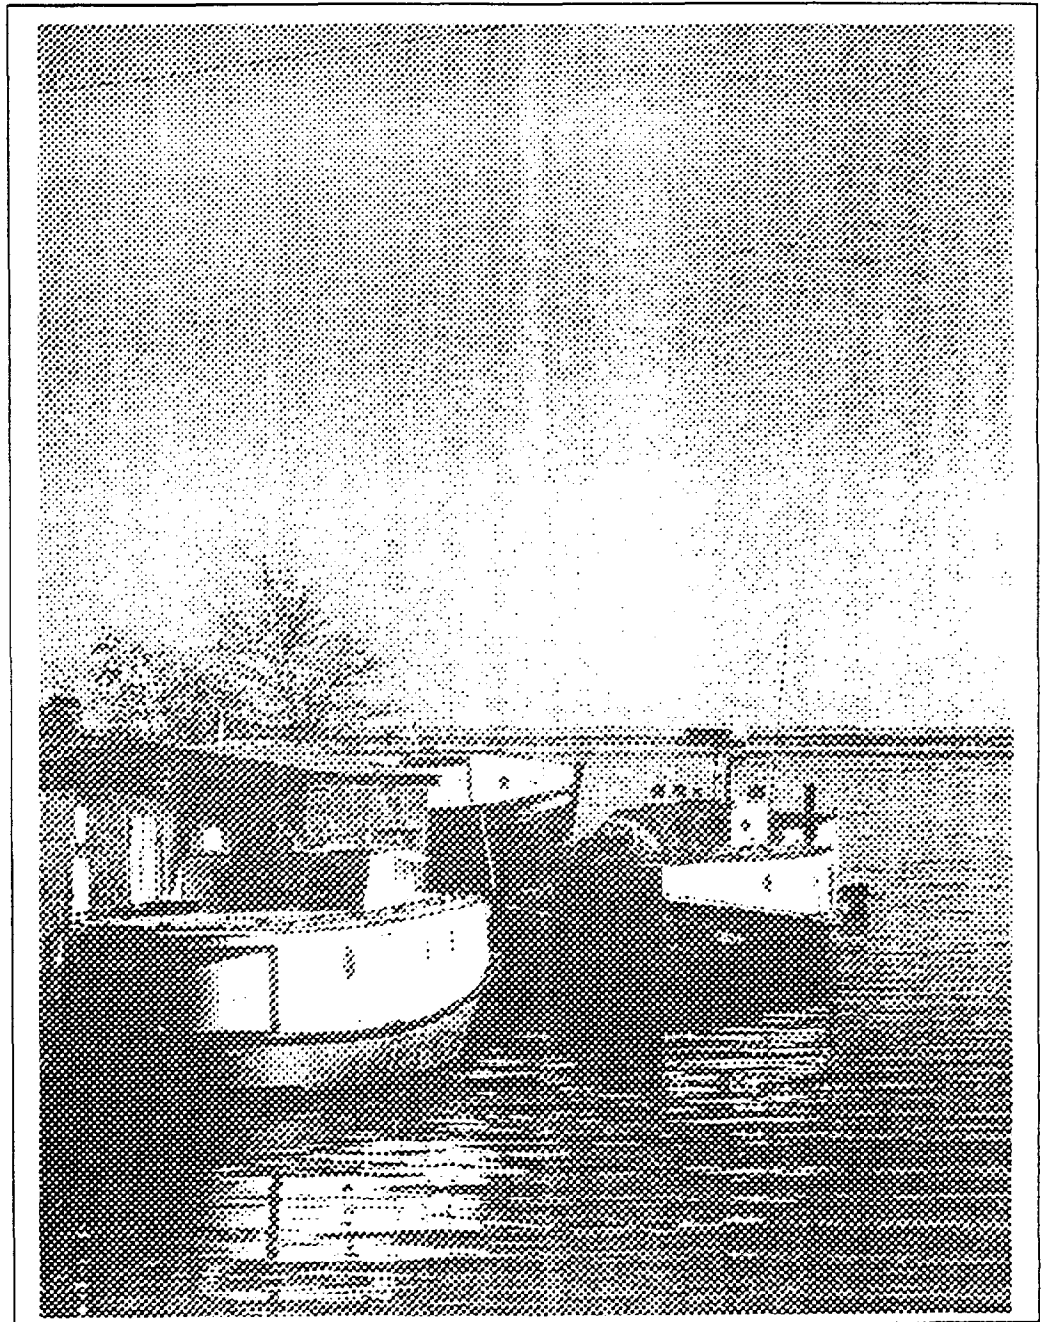

Lake Superior

Lake Superior is the largest freshwater lake in the world. Extending 350 miles east to west and 160 miles north to south, Superior has a surface area slightly larger than the state of South Carolina. The lake is 600 feet above sea level, with an average depth of 489 feet and a maximum depth of 1,399 feet.

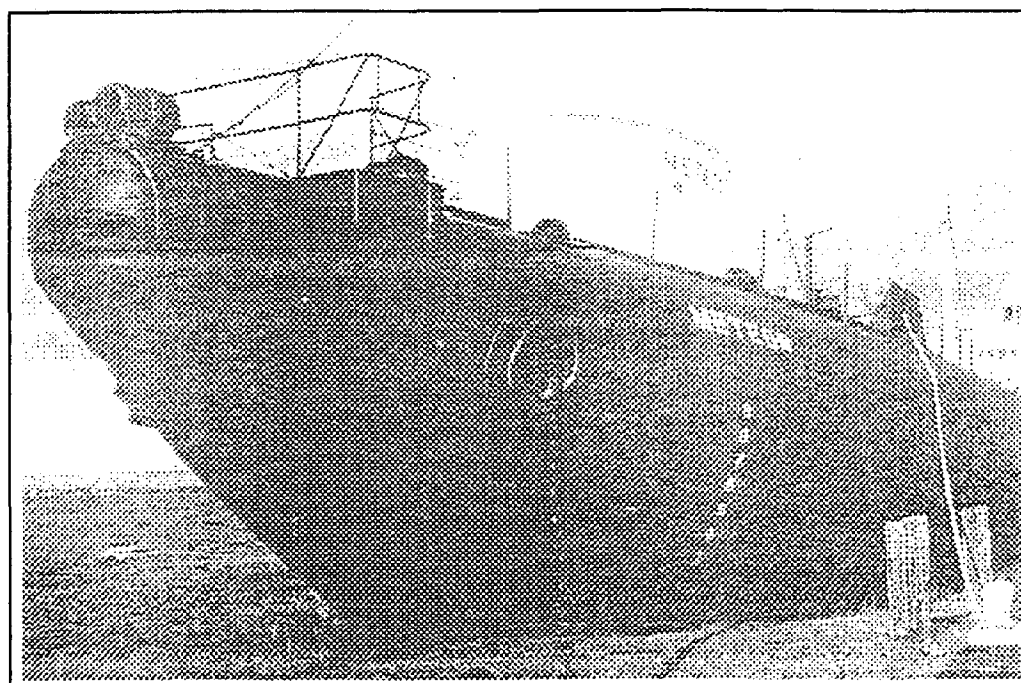

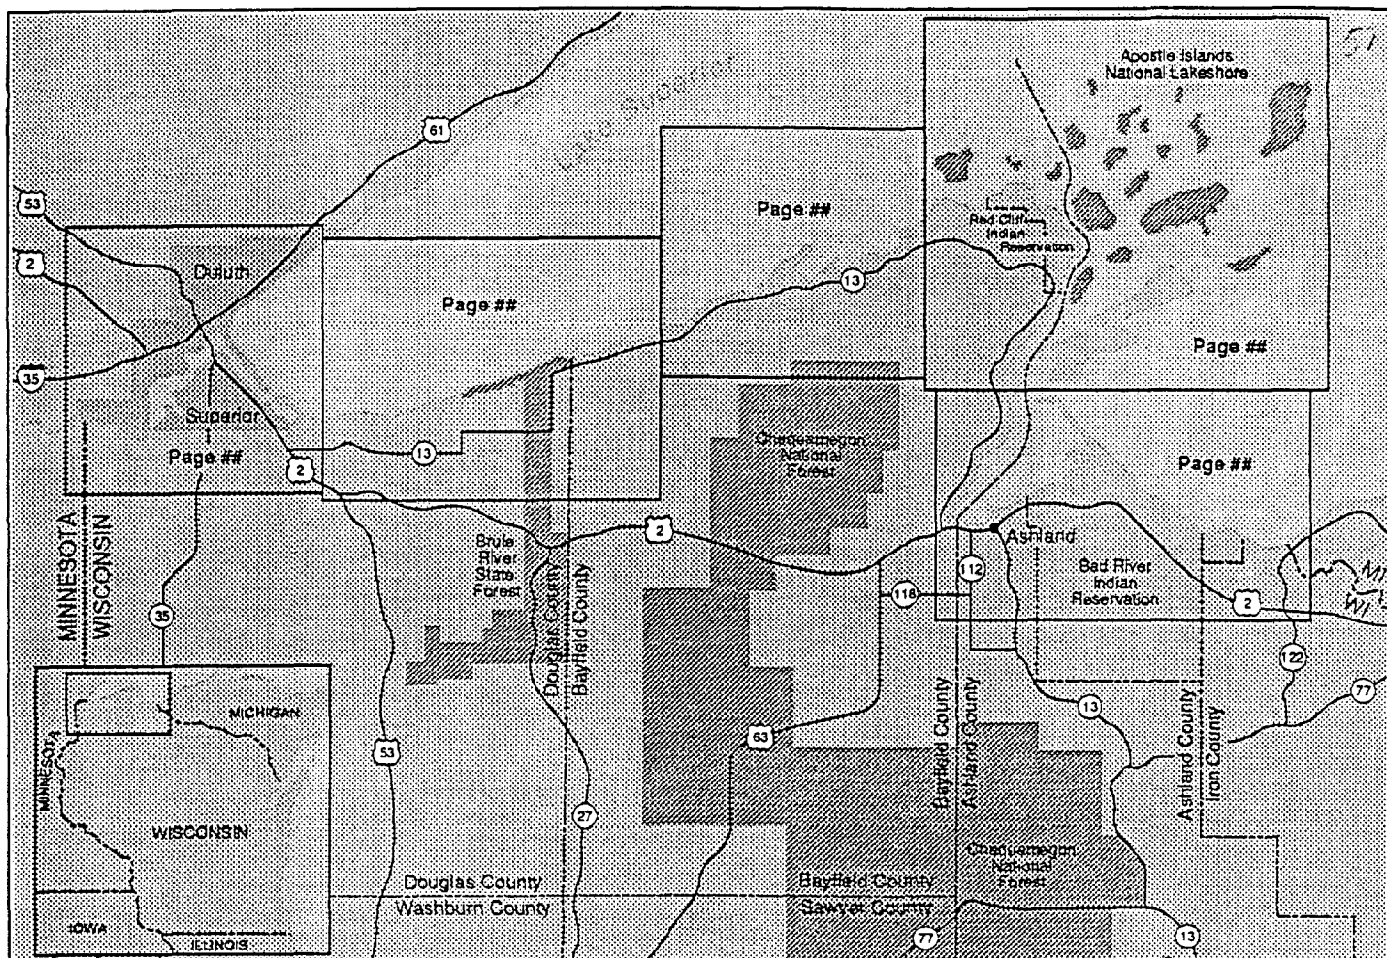

Wisconsin's beautiful Lake Superior shoreline is 156 miles long. At its western end are the twin ports of Superior and Duluth; near its eastern end is the rugged Bayfield Peninsula, with the Apostle Islands in the surrounding waters.

Lake Superior is also bordered by Minnesota, Michigan, and the province of Ontario, Canada. Much of the region remains wild and remote. Superior's waters remain the most pristine of all the Great Lakes.

The following pages list many Lake Superior attractions to explore. With 61 public access sites in Wisconsin, there are many opportunities to enjoy the magnificent waters.

Commercial fishing tugs, Lake Superior

Great Lakes Sidelites

The Whalebacks

Among the lakes' more unusual vessels were the whalebacks — ships with low, cigar-shaped hulls that tapered at the ends like a pig's snout. In the 1890s, Superior shipyards produced 39 whalebacks, including the "Christopher Columbus," the only passenger whaleback built. The last whaleback on the Great Lakes, the "S.S. Meteor," persevered into the 1960s, when it was retired to become a museum ship at Superior.

Herbster

Tiny Herbster offers long sand beaches, beautiful scenery, and trout fishing in the Cranberry River. You can camp along the shores

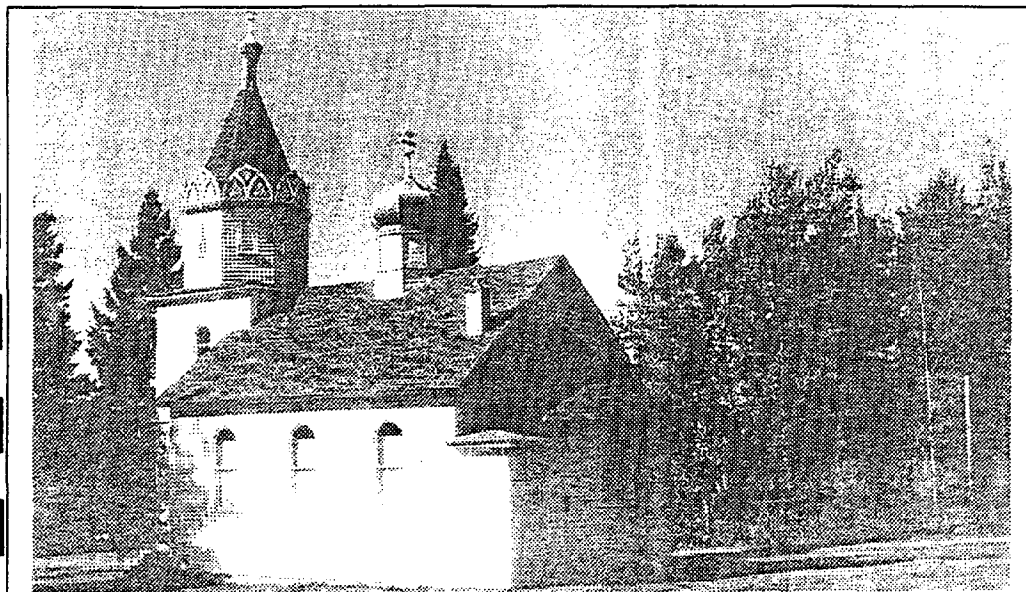

of Lake Superior or explore the stillness of the Chequamegon National Forest by traveling south on the rustic Lenawee Road. For more information, contact

Herbster Community Club,
P.O. Box 65, Herbster, WI
54844; 715/774-3740.

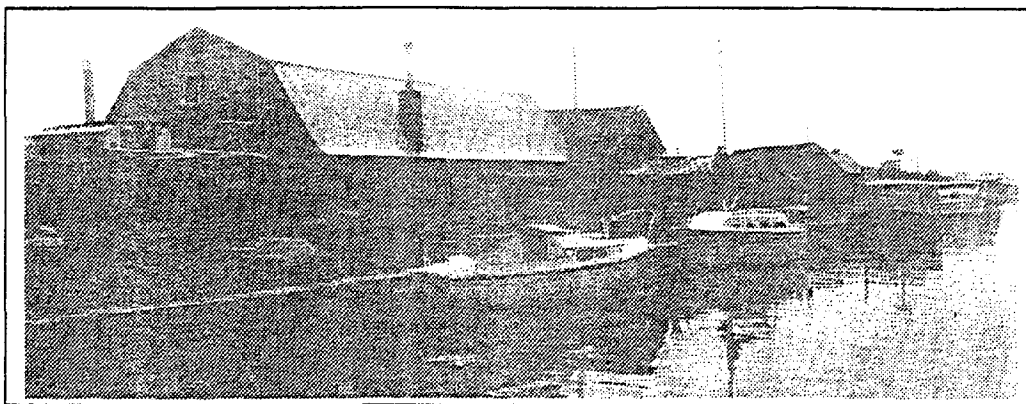

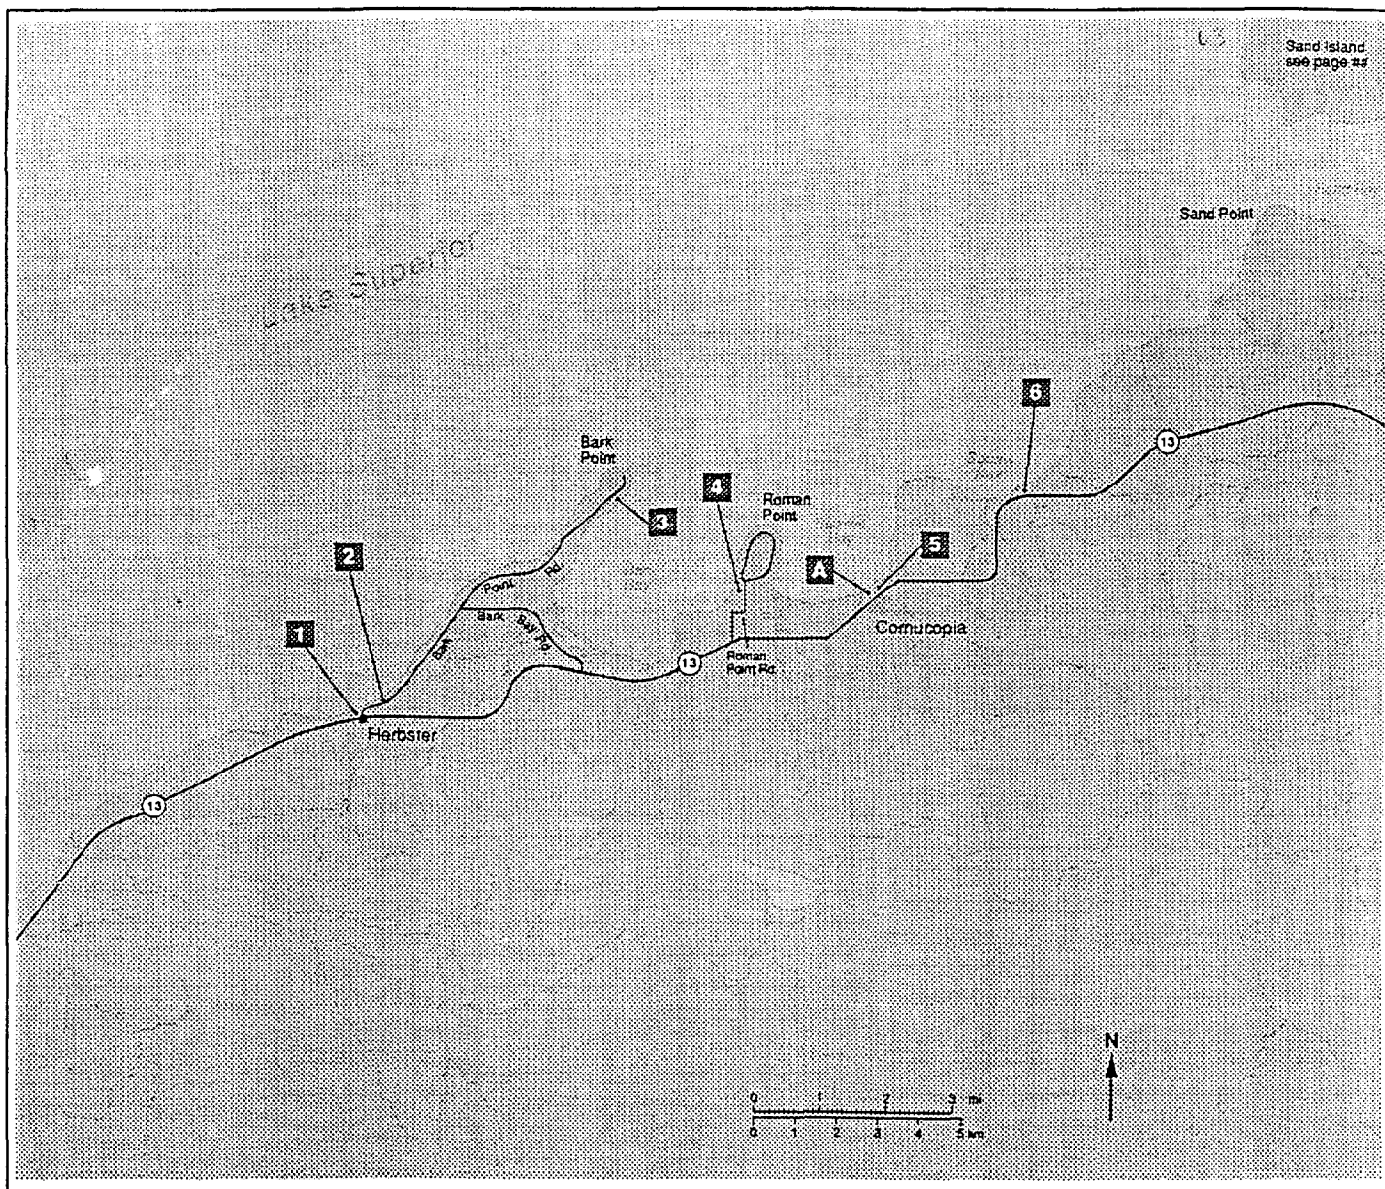

Cornucopia

A small commercial fishing port boasting four and one-half miles of sandy beach, Cornucopia is Wisconsin's northernmost village. Be sure to see the picturesque, onion-domed St. Mary's Greek Orthodox Church and visit the quaint waterfront shops.

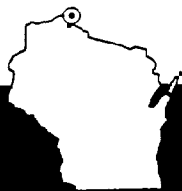

Nearby, the famed Squaw Bay sea caves, sculpted over thousands of years by wind and Lake Superior's waves, are favorites with small boaters and kayaking enthusiasts. For more information, contact the **Cornucopia Business Association**, P.O. Box 183, Cornucopia, WI 54827-0183; 715/742-3232.

Red Cliff

The Red Cliff
Reservation, home of the
Red Cliff Band of Lake
Superior Chippewa, has a

modern campground and
marina. Visit the Buffalo
Art Center to see Native
American art exhibits and
demonstrations of basket-
and canoe-making.

The Red Cliff campground and marina

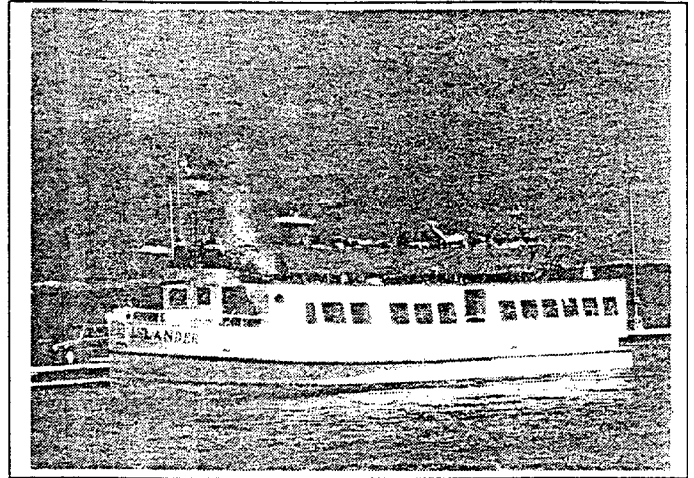

Lake Superior

Bayfield

Bayfield is the gateway to the Apostle Islands National Lakeshore and a center for deepwater sailing buffs and fishing enthusiasts. Along the waterfront, visit **Booth Cooperage**, Wisconsin's only working barrel factory/museum, to see craftsmen make barrels. **Lake Superior Big Top Chautauqua** presents plays, concerts and musicales,

done in the spirit of the old time "tent shows." It's great family entertainment. Sample whitefish livers, a local delicacy served in area restaurants. This is also apple and berry country; look for apples, cider and raspberries in season.

The **Apostle Islands Cruise Service** offers narrated cruises of the National Lakeshore, featuring spectacular Lake Superior scenery,

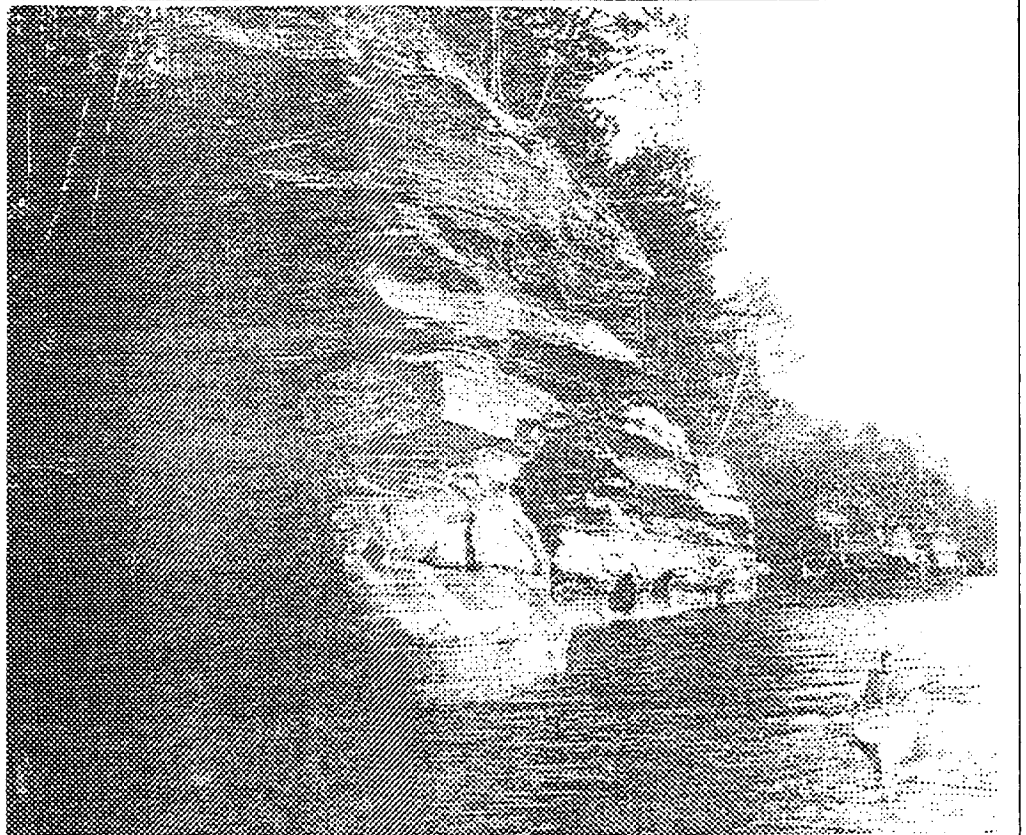

Apostle Islands excursion boat, Bayfield

Great Lakes Sidelites

Apostle Islands National Lakeshore

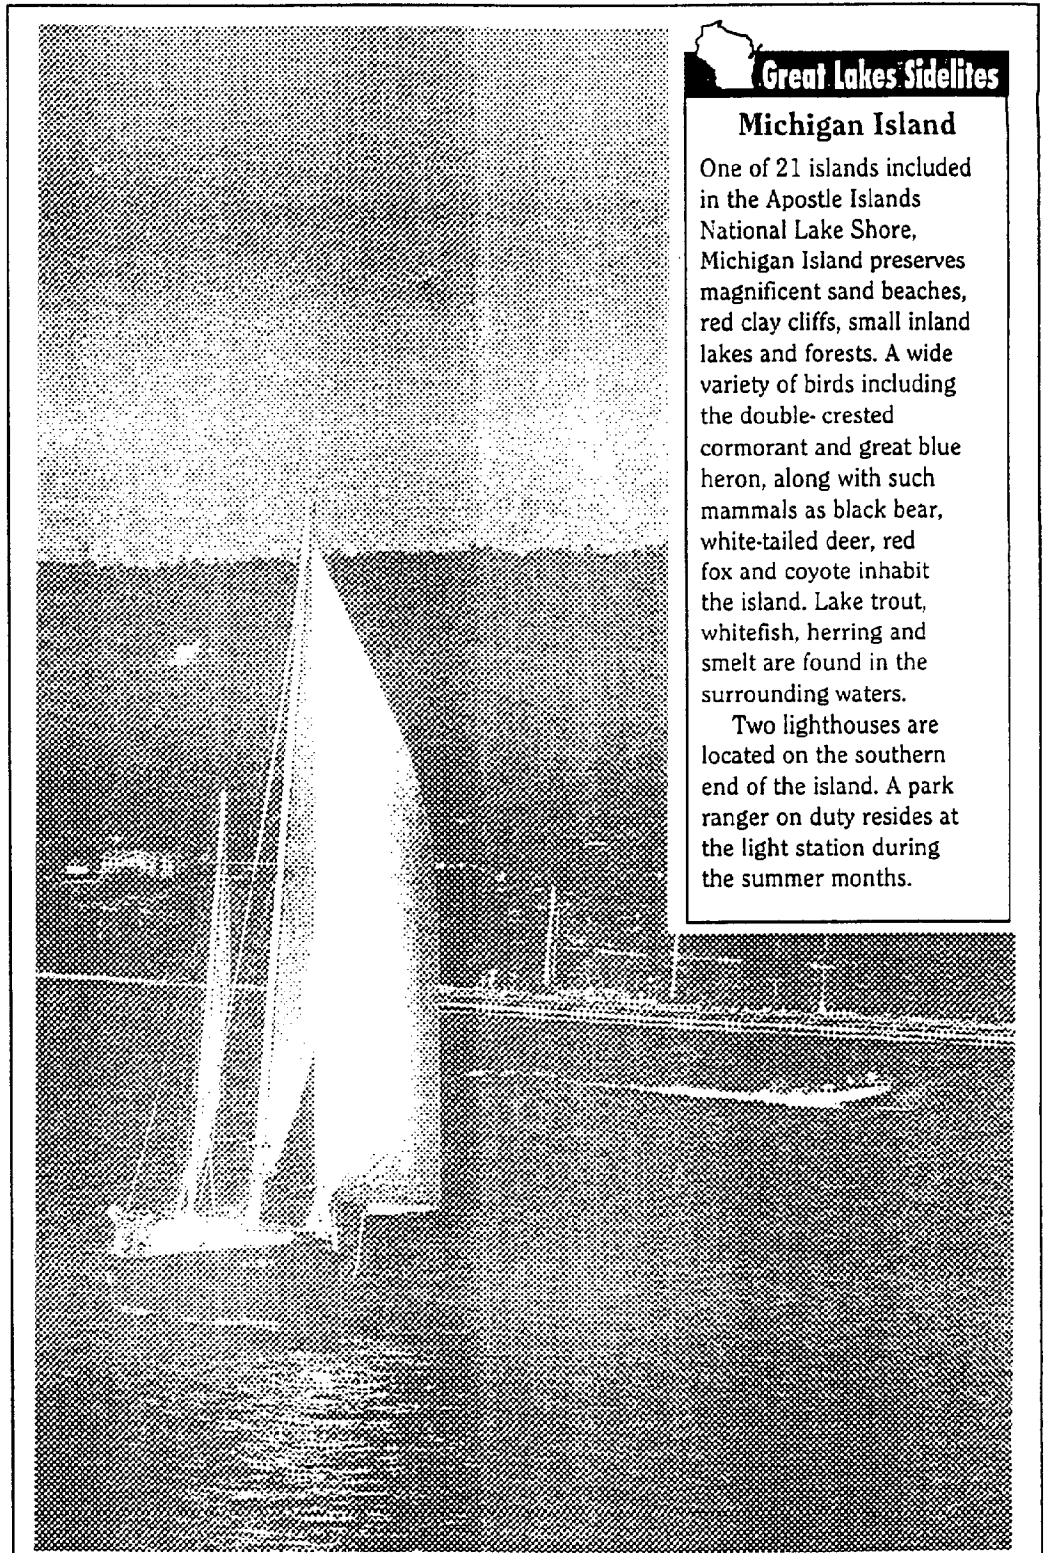

Twenty-one of the 22 **Apostle Islands** are included in the national lakeshore, along with a segment of shoreline north of Bayfield. The **Little Sand Bay Visitor Center** offers guided tours of the **Hokenson Brothers Commercial Fishing Museum**. Several islands have lighthouses, and camping is allowed on some islands. Visit the **Apostle Islands National Lakeshore Headquarters** in Bayfield for lakeshore information and to see slides, films and exhibits about the islands.

lighthouses and island visits. For more information, contact the **Bayfield Chamber of Commerce**, 42 Broad St., P.O. Box 138, Bayfield, WI 54814; 715/779-3335, 800/447-4094.

Madeline Island

Bayfield is the embarkation point for the **Madeline Island Ferry** which carries cars, motorhomes, bikes and passengers to the island. The island village of La Pointe was originally a French trading post established in the 18th century. Visit the **Madeline Island Historical Museum**, with a new visitor center and a wealth of exhibits about island history. The **Madeline Island Bus Tour** offers narrated island tours. **Big Bay State Park** has family camping, hiking and nature trails and a beautiful sand beach. Captained or bareboat sailboat charters are available at the marina by advance reservation. For more information, contact the **Madeline Island Chamber of Commerce**, P.O. Box 274, La Pointe, WI 54850-0274; 715/747-2801.

Great Lakes Sidelites

Michigan Island

One of 21 islands included in the Apostle Islands National Lake Shore, Michigan Island preserves magnificent sand beaches, red clay cliffs, small inland lakes and forests. A wide variety of birds including the double-crested cormorant and great blue heron, along with such mammals as black bear, white-tailed deer, red fox and coyote inhabit the island. Lake trout, whitefish, herring and smelt are found in the surrounding waters.

Two lighthouses are located on the southern end of the island. A park ranger on duty resides at the light station during the summer months.

Washburn

Washburn is another sport fishing center. Several buildings are constructed of handsome Lake Superior brownstone, including the **Bayfield County Courthouse** and the **Carnegie City Library and Museum**, which has exhibits devoted to local history. Nearby, the **State Fish Hatchery** has displays of Lake Superior fish; the hatchery rears lake trout. The northern **Chequamegon National Forest** offers camping, hiking, cross-country skiing and snowmobiling. For more information, contact the Washburn Marketing &

Washburn Marina, Lake Superior

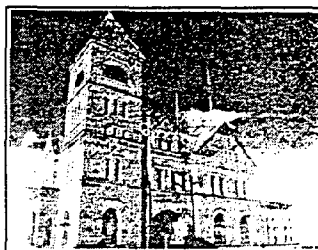

Promotion Committee, 204 W. Bayfield St., Washburn, WI 54891; 715/373-5017.

Ashland

Ashland's Soo Line Iron Ore Dock, stretching 1,800 feet into Lake Superior, serves as a reminder of the area's rich mining and shipping history. The **Northern Wisconsin Interpretive Center** has exhibits on Lake Superior shipping, Chippewa Indian culture, the Apostle Islands and the region's ethnic traditions.

Northland College is nationally known for its environmental studies program and the **Sigurd Olson Environmental Institute**. The **Ashland Museum** has local history exhibits and an exquisite doll collection. Ashland's beautiful brownstone city hall is listed on the National Register of Historic Places. For more information, contact the **Ashland Chamber of Commerce**, 320 W. 4th St., Ashland, WI 54806-0746; 715/682-2500, 800/284-9484.

Ashland City Hall

Saxon Harbor area

Some of Wisconsin's highest and most spectacular waterfalls are found on the nearby Montreal River. Ask locally about the best access

points. In nearby Hurley, the **Iron County Historical Museum** displays memorabilia of the area's rich mining, logging and farming heritage. For more information, contact the **Hurley Chamber of Commerce**, 110A 2nd Ave. S., Hurley, WI 54535; 715/561-4334/3866.

Kakagon and Bad River Sloughs

The 2,900-acre wetlands in southwestern Chequamegon Bay provide habitat and food for fish, aquatic plants, fur-bearing animals and waterfowl, and recreational opportunities for sportsmen. The sloughs include about 12 square miles of wild rice beds, which are harvested by the Chippewa Indians of the Bad River Reservation. These important wetlands have been listed on the National Registry of Natural Landmarks.
